Not every illness has a biological remedy. Poverty, Health and Law presents health in the broader social context of people's lives, providing insights into the advancement of health through legal advocacy and interdisciplinary solutions to complex social problems. Focusing on basic legal rights and their relation to health -- income and employment, housing, education, legal status, and personal safety -- the authors provide information and insight into how the law may be used as a tool to improve health and how health care providers and lawyers can work together to invoke more effective and preventive remedies for patients and clients. As America prepares for major reform of its health care system, Poverty, Health and Law brings to the forefront the need to address the root causes of illness and poor health, particularly among vulnerable populations, by exploring remedies and innovations both within and outside of the health care system.

In the era of mass incarceration, over 600,000 people are released from federal or state prison each year, with many returning to chaotic living environments rife with violence. In these circumstances, how do former prisoners navigate reentering society? In *Homeward*, sociologist Bruce Western examines the tumultuous first year after release from prison. Drawing from in-depth interviews with over one hundred individuals, he describes the lives of the formerly incarcerated and demonstrates how poverty, racial inequality, and failures of social support trap many in a cycle of vulnerability despite their efforts to rejoin society. Western and his research team conducted comprehensive interviews with men and women released from the Massachusetts state prison system who returned to neighborhoods around Boston. Western finds that for most, leaving prison is associated with acute material hardship. In the first year after prison, most respondents could not afford their own housing and relied on family support and government programs, with half living in deep poverty. Many struggled with chronic pain, mental illnesses, or addiction—the most important predictor of recidivism. Most respondents were also unemployed. Some older white men found union jobs in the construction industry through their social networks, but many others, particularly those who were black or Latino, were unable to obtain full-time work due to few social connections to good jobs, discrimination, and lack of credentials. Violence was common in their lives, and often preceded their incarceration. In contrast to the stereotype of tough criminals preying upon helpless citizens, Western shows that many former prisoners were themselves subject to lifetimes of violence and abuse and encountered more violence after leaving prison, blurring the line between victims and perpetrators. Western concludes that boosting the social integration of former prisoners is key to both ameliorating deep disadvantage and strengthening public safety. He advocates policies that increase assistance to those in their first year after prison, including guaranteed housing and health care, drug treatment, and transitional employment. By foregrounding the stories of people struggling against the odds to exit the criminal justice system, *Homeward* shows how overhauling the process of prisoner reentry and rethinking the foundations of justice policy could address the harms of mass incarceration.

*International Communism and the Spanish Civil War* provides an intimate picture of international communism in the Stalin era. Exploring the transnational exchanges that occurred in Soviet-structured spaces - from clandestine schools for training international revolutionaries in Moscow to the International Brigades in Spain - the book uncovers complex webs of interaction, at once personal and political, that linked international communists to one another and the Soviet Union. The Spanish Civil War, which coincided with the great purges in the Soviet Union, stands at the center of this grassroots history. For many international communists, the war came to define both their life histories and political commitments. In telling their individual stories, the book calls attention to a central paradox of Stalinism - the simultaneous celebration and suspicion of transnational interactions - and illuminates the appeal of a cause that promised solidarity even as it practiced terror.

*Desert Tiles* brings a fresh spin on the "Corraoesque" theme of text / image coming "alive", becoming a "semiotic organism," undertaken here via the twin metaphors of text as a desert and reading as necromancy. The desert here is both literal (as the ever-shifting "dune-script" of meaning) and a place "deserted", a place of the always-already absent voice, into which the reader is invited to venture out. Reading as necromancy entails summoning the voice of the absent/"dead" author, communing with the past action(s) of signification and by decoding it, yielding messages for (some kind of) the future. "Read this geometry in such a way as to allow the text unit increment itself to be unbounded, allowing for fragments of itself to be reincorporated in such a way as to interlock-in voxelized gradient-with vacancies identical to those fragments excised from the primary corpus of the text unit itself in such a way as to be both of itself and containing another, like a splinter of bone healing into liver tissue."-John Trefry, author of *Plats* "Mike Corrao's *Desert Tiles* takes an ekphrastic approach to our probable swallow by ocular data. The writer/reader is in a state of pixelated becoming. There is no what it/we/they become(s), nor how, nor why, even - a barely-where "textures are compressed and corrupted" and a barely-who "hums their jaw against the sand." Something is in process of being downloaded, devoured, dissolved. It's icky, because it's true. What happens when the happening is pure mechanics, an I thinking and therefore (without reason). As the body is desertified, the body-esque remains: a fine-grained graphic that "yawns and weeps" even while you (the body? Or body-esque?) "want to cry, but are incapable." In the poem "you ask yourself if this still counts as lived experience," while IRL you are wondering if you count as something R and L? Or "is its not being real really that important?" A proper noun believes in something, like the moon landing, or politics, or that 7up & saltines will cure a stomachache. "The static speaks to me." Poor robots, I think, poor tin man. A heart and blood are black and white and indexed quietly, and the index beats. Who will read all the indexes left behind, desiring their un-deserted world? One might desire the desert. Liking the gray sand. And then what."-MJ Gette, author of *The Walls They Left Us* "Set in a desert created by a 'borgesian deity, ' a wandering 'wastrel-form' encounters a Necromancer. This isn't the Desert of the Real, but a literary simulacrum where wanderer and Mancer engage in a dance of death (or birth)? Corrao reveals a book giving birth to itself, not as a postmodernist contrivance, but as a slow-paced prose poem. Body horror collides with a kind of digital mysticism. With both words and images, we witness a sky the color of TV tuned to a dead channel and the birth of the new flesh."-Driftless

The editors and contributors to Color of Violence ask: What would it take to end violence against women of color? Presenting the fierce and vital writing of organizers, lawyers, scholars, poets, and policy makers, Color of Violence radically repositions the antiviolence movement by putting women of color at its center. The contributors shift the focus from domestic violence and sexual assault and map innovative strategies of movement building and resistance used by women of color around the world. The volume's thirty pieces—which include poems, short essays, position papers, letters, and personal

reflections—cover violence against women of color in its myriad forms, manifestations, and settings, while identifying the links between gender, militarism, reproductive and economic violence, prisons and policing, colonialism, and war. At a time of heightened state surveillance and repression of people of color, Color of Violence is an essential intervention. Contributors. As thrilling as any novel, as taut and exciting as any adventure story, Peter Hathaway Capstick's *Death in the Long Grass* takes us deep into the heart of darkness to view Africa through the eyes of one of the most renowned professional hunters. Few men can say they have known Africa as Capstick has known it—leading safaris through lion country; tracking man-eating leopards along tangled jungle paths; running for cover as fear-maddened elephants stampede in all directions. And of the few who have known this dangerous way of life, fewer still can recount their adventures with the flair of this former professional hunter-turned-writer. Based on Capstick's own experiences and the personal accounts of his colleagues, *Death in the Long Grass* portrays the great killers of the African bush—not only the lion, leopard, and elephant, but the primitive rhino and the crocodile waiting for its unsuspecting prey, the titanic hippo and the Cape buffalo charging like an express train out of control. Capstick was a born raconteur whose colorful descriptions and eye for exciting, authentic detail bring us face to face with some of the most ferocious killers in the world—underrated killers like the surprisingly brave and cunning hyena, silent killers such as the lightning-fast black mamba snake, collective killers like the wild dog. Readers can lean back in a chair, sip a tall, iced drink, and revel in the kinds of hunting stories Hemingway and Ruark used to hear in hotel bars from Nairobi to Johannesburg, as veteran hunters would tell of what they heard beyond the campfire and saw through the sights of an express rifle.

In a chest of drawers bequeathed by his grandmother, author Randal Keynes discovered the writing case of Charles and Emma Darwin's beloved daughter Annie Darwin, who died at the age of ten. He also found the notes Darwin kept throughout Annie's illness, the eulogy he delivered at her funeral—and provocative new insights into Darwin's views on nature, evolution, and the human condition. In *Darwin, His Daughter & Human Evolution*, Keynes shows that Darwin was not "a cold intellect with no place for love in his famous 'struggle for existence,' [but]...a man of uncommon warmth" (*Scientific American*). *Creation: The True Story of Charles Darwin* is now a major motion picture and the movie tie-in paperback is also available from Riverhead Books.
