Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Use the neuroscience of emotional learning to transform your teaching. How can the latest breakthroughs in the neuroscience of emotional learning transform the classroom? How can teachers use the principles and practices of positive psychology to ensure optimal 21st-century learning experiences for all children? Patty O'Grady answers those questions. Positive Psychology in the Elementary School Classroom presents the basics of positive psychology to educators and provides interactive resources to enrich teachers' proficiency when using positive psychology in the classroom. O'Grady underlines the importance of teaching the whole child: encouraging social awareness and positive relationships, fostering self-motivation, and emphasizing social and emotional learning. Through the use of positive psychology in the classroom, children can learn to be more emotionally aware of their own and others' feelings, use their strengths to engage academically and socially, pursue meaningful lives, and accomplish their personal goals. The book begins with Martin Seligman's positive psychology principles, and continues into an overview of affective learning, including its philosophical and psychological roots, from finding the "golden mean" of emotional regulation to finding a child's potencies and "golden self." O'Grady connects the core concepts of educational neuroscience to the principles of positive psychology, explaining how feelings permeate the brain, affecting children's thoughts and actions; how insular neurons make us feel empathy and help us learn by observation; and how the frontal cortex is the hall monitor of the brain. The book is full of practical examples and interactive resources that invite every educator to create a positive psychology classroom, where children can flourish and reach their full potential.

In the 7 Habits series, international bestselling author Stephen R. Covey showed us how to become as effective as it is possible to be. In his long-awaited new book, THE 8th HABIT, he opens up an entirely new dimension of human potential, and shows us how to achieve greatness in any position and any venue. All of us, Covey says, have within us the means for greatness. To tap into it is a matter of finding the right balance of four human attributes: talent, need, conscience and passion. At the nexus of these four attributes is what Covey calls voice - the unique, personal significance we each possess. Covey exhorts us all to move beyond effectiveness into the realm of greatness - and he shows us how to do so, by engaging our strengths and locating our powerful, individual voices. Why do we need this new habit? Because we have entered a new era in human history. The world is a profoundly different place than when THE 7 HABITS OF HIGHLY EFFECTIVE PEOPLE was originally published in 1989. The challenges and complexity we face today are of a different order of magnitude. We enjoy far greater autonomy in all areas of our lives, and along with this freedom comes the expectation that we will manage ourselves, instead of being managed by others. At the same time, we struggle to feel engaged, fulfilled and passionate. Tapping into the higher reaches of human genius and motivation to find our voice requires a new mindset, a new skill-set, a new tool-set - in short, a whole new habit.

Everyone gets angry, so it's never too early for children to learn to recognize feelings of anger, express them, and build skills for coping with anger in helpful, appropriate ways. Children learn that it is okay to feel angry—but not okay to hurt anyone with actions or words. They discover concrete skills for working through anger: self-calming, thinking, getting help from a trusted person, talking and listening, apologizing, being patient, and viewing others positively. Reassuring and supportive, the book helps preschool and primary-age children see that when they cool down and work through anger, they can feel peaceful again.

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

**#1 NEW YORK TIMES BESTSELLER • A memoir of leadership and success:** The executive chairman of Disney, Time's 2019 businessperson of the year, shares the ideas and values he embraced during his fifteen years as CEO while reinventing one of the world's most beloved companies and inspiring the people who bring the magic to life. **NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR** Robert Iger became CEO of The Walt Disney Company in 2005, during a difficult time. Competition was more intense than ever and technology was changing faster than at any time in the company's history. His vision came down to three clear ideas: Recommit to the concept that quality matters, embrace technology instead of fighting it, and think bigger—think global—and turn Disney into a stronger brand in international markets. Today, Disney is the largest, most admired media company in the world, counting Pixar, Marvel, Lucasfilm, and 21st Century Fox among its properties. Its value is nearly five times what it was when Iger took over, and he is recognized as one of the most innovative and successful CEOs of our era. In *The Ride of a Lifetime*, Robert Iger shares the lessons he learned while running Disney and leading its 220,000-plus employees, and he explores the principles that are necessary for true leadership, including: • Optimism. Even in the face of difficulty, an optimistic leader will find the path toward the best possible outcome and focus on that, rather than give in to pessimism and blaming. • Courage. Leaders have to be willing to take risks and place big bets. Fear of failure destroys creativity. • Decisiveness. All decisions, no matter how difficult, can be made on a timely basis. Indecisiveness is both wasteful and destructive to morale. • Fairness. Treat people decently, with empathy, and be accessible to them. This book is about the relentless curiosity that has driven Iger for forty-five years, since the day he started as the lowliest studio grunt at ABC. It's also about thoughtfulness and respect, and a decency-over-dollars approach that has become the bedrock of every project and partnership Iger pursues, from a deep friendship with Steve Jobs in his final years to an abiding love of the Star Wars mythology. "The ideas in this book strike me as universal" Iger writes. "Not just to the aspiring CEOs of the world, but to anyone wanting to feel less fearful, more confidently themselves, as they navigate their professional and even personal lives."
