This book uses an in-depth, phenomenological interview approach to explain the generational characteristics of today's Chinese university youths and the critical dispositions they believe indispensable in acquiring English as an academic language in and outside school settings. By presenting the authentic voices of the recruited participants, the book clarifies how English for academic purposes (EAP), as an emerging global phenomenon and a research-informed practice, enables and empowers them for conscious self-transformation and critical awareness development through language study. The book also explores issues arising in the fields of general English language teaching as well as traditional and critical EAP, and discusses university English language learners' learning needs and rights. The book further promotes a dynamic and transformative University EAP pedagogy of particularity, practicality, and possibility moving from the oppression of language education to its liberation, and the increasing critical consciousness among the present and future university youths in a time of great social changes.

This book is unique in bringing together theory, research, and practice about English encountered outside the classroom – extramural English – and how it affects teaching and learning. The book investigates ways in which learners successfully develop their language skills through extramural English and provides tools for teachers to make use of free time activities in primary and secondary education. The authors demonstrate that learning from involvement in extramural English activities tends to be incidental and is currently underutilized in classroom work. A distinctive strength is that this volume is grounded in theory, builds on results from empirical studies, and manages to link theory and research with practice in a reader-friendly way. Teacher-educators, teachers and researchers of English as a foreign language and teachers of English as a second language across the globe will find this book useful in developing their use of extramural English activities as tools for language learning.

Educating dual language learners (DLLs) and English learners (ELs) effectively is a national challenge with consequences both for individuals and for American society. Despite their linguistic, cognitive, and social potential, many ELs "who account for more than 9 percent of enrollment in grades K-12 in U.S. schools" are struggling to meet the requirements for academic success, and their prospects for success in postsecondary education and in the workforce are jeopardized as a result. Promoting the Educational Success of Children and Youth Learning English: Promising Futures examines how evidence based on research relevant to the development of DLLs/ELs from birth to age 21 can inform education and health policies and related practices that can result in better educational outcomes. This report makes recommendations for policy, practice, and research and data collection focused on addressing the challenges in caring for and educating DLLs/ELs from birth to grade 12.

Highlighting some interesting and intriguing aspects of English phonetics and phonology from a variety of perspectives, this book brings up a number of empirical questions in order to emphasize the necessity of taking a very broad view of what spoken English means in today's socio-cultural context. English has become a truly global means of communication, used as a first, second, or additional language by millions and millions of diverse speakers, in a multitude of different communicative contexts, so that the very notions of native and non-native seem to have changed profoundly, as have the notions of central/ peripheral and standard/ non-standard with regard to English varieties spoken around the globe. Therefore, today more than ever before, in studying English phonetics many small research steps need to be taken to provide diverse and broad empirical data from as many different standpoints as possible. This collection indeed looks at English phonetics from a wide spectrum of perspectives, including those of native or EFL speakers, language varieties, L2 language teaching and learning, as well as language contact, development, and change.

Introduce your learners to creative writing and writing for a purpose. Learners work individually and collaboratively, developing skills such as creative thinking, planning, drafting, peer evaluation and editing.

It owes much to the contributions of members of the language teaching profession across Europe and beyond. This volume contains: ? an explanation of the key aspects of the CEFR for teaching and learning; ? a complete set of updated CEFR descriptors that replaces the 2001 set with: - modality-inclusive and gender-neutral descriptors; - added detail on listening and reading; - a new Pre-A1 level, plus enriched description at A1 and C levels; - a replacement scale for phonological competence; - new scales for mediation, online interaction and plurilingual/pluricultural competence; - new scales for sign language competence; ? a short report on the four-year

- ? promote and support the learning and teaching of modern languages;
- ? enhance intercultural dialogue, and thus mutual understanding, social cohesion and democracy;
- ? protect linguistic and cultural diversity in Europe; and
