'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle

In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.

In *Mordin On Time*, Nick Mordin sets out his method for answering the most fundamental question facing punters in any race, namely: which is the fastest horse? He was timing

the sections of races with a stop watch, estimating wind strength and direction, adjusting for movements of running rails, using projected times and calculating average times years before the best-selling American books on speed rating were published. This new edition incorporates much new material, including standard times for all Irish racecourses (plus the major French ones). Mordin On Time enables the reader to construct their own speed ratings wherever they live.

Bridging the gap between physics and astronomy textbooks, this book provides step-by-step physical and mathematical development of fundamental astrophysical processes underlying a wide range of phenomena in stellar, galactic, and extragalactic astronomy. The book has been written for upper-level undergraduates and beginning graduate students, and its strong pedagogy ensures solid mastery of each process and application. It contains over 150 tutorial figures, numerous examples of astronomical measurements, and 201 exercises. Topics covered include the Kepler–Newton problem, stellar structure, binary evolution, radiation processes, special relativity in astronomy, radio propagation in the interstellar medium, and gravitational lensing.

Applications presented include Jeans length, Eddington luminosity, the cooling of the cosmic microwave background (CMB), the Sunyaev–Zeldovich effect, Doppler boosting in jets, and determinations of the Hubble constant. This text is a stepping stone to more specialized books and primary literature. Password-protected solutions to the exercises are available to instructors at

www.cambridge.org/9780521846561.

Baby Jaguar is missing. Read along with Dora as she looks for her friend!

"Subramaniam examines how science and religion have

come together to propel a vision of the modern Indian nation, and in particular, a Hindu nationalist vision of India. Five illustrative cases of bionationalism animate this book: Hindu nationalist narratives of scientific development, colonial law and sexual politics in India, surrogacy and women's roles, the politics of caste and race in the language of genes and genomics, and the alignment of environmental scientists and religious activists. Subramaniam demonstrates that the politics of gender, race, class, caste, sexuality, and indigeneity are deeply implicated in the projects and narratives of the nation. At the same time, she seeks spaces of possibility and new narratives for planetary salvation that defy binary logics, incorporating science and religion, human and nonhuman, and nature and culture"--

The best-selling text for the Business Spanish course, *ÉXITO COMERCIAL* gives post-intermediate students of Spanish a solid foundation in business vocabulary, basic business and cultural concepts, and situational practice that will prepare them for success in today's Spanish-speaking business world. This comprehensive and definitive program integrates textual, aural, visual, and web-delivered media to deliver the most complete instructional and learning experience. More than just a handbook containing frequently-used business terms and grammatical constructions, *ÉXITO COMERCIAL* turns students into potential professionals by improving the critical thinking and problem-solving skills needed in the business world. Each chapter incorporates a representative variety of situations, transactions, and conflicts into real-life communicative activities and

simulations that challenge students to find effective and profitable solutions while developing geo-demographic literacy and cross-cultural communication skills.
