Trans(in)fusion is a highly original book that tries to radicalize our ways of 'critical thinking' across disciplines. The book, refreshingly, brings into play critical philosophy, literary criticism, studies in mathematics, physics, chemistry and developmental biology, and various other disciplines and epistemes to set up a tenure and tenor of 'critical thinking'. The book is an exclusive intervention in how thinking across traditions and systems of thought can generate distinct interpretive experiences. It questions, in a unique transcultural and transversal bind, our ways of hermeneutic and literary-cultural thinking. Trans(in)fusion resets the dialectics between text and theory.

In July 1881, Lt. A.W. Greely and his crew of 24 scientists and explorers were bound for the last region unmarked on global maps. Their goal: Farthest North. What would follow was one of the most extraordinary and terrible voyages ever made. Greely and his men confronted every possible challenge—vicious wolves, sub-zero temperatures, and months of total darkness—as they set about exploring one of the most remote, unrelenting

environments on the planet. In May 1882, they broke the 300-year-old record, and returned to camp to eagerly await the resupply ship scheduled to return at the end of the year. Only nothing came. 250 miles south, a wall of ice prevented any rescue from reaching them. Provisions thinned and a second winter descended. Back home, Greely's wife worked tirelessly against government resistance to rally a rescue mission. Months passed, and Greely made a drastic choice: he and his men loaded the remaining provisions and tools onto their five small boats, and pushed off into the treacherous waters. After just two weeks, dangerous floes surrounded them. Now new dangers awaited: insanity, threats of mutiny, and cannibalism. As food dwindled and the men weakened, Greely's expedition clung desperately to life. *Labyrinth of Ice* tells the true story of the heroic lives and deaths of these voyagers hell-bent on fame and fortune—at any cost—and how their journey changed the world.

Photographer Jay Fleming turned his attention to Smith and Tangier Islands - the Chesapeake Bay's last inhabited 'water-locked' islands. Fleming has made countless trips to the islands to document the unique way of life and environment that have been shaped by isolation and the waters of the Chesapeake. This collection of photographs will fill the pages of Fleming's second book, *Island Life*. This body work comes at an important time for the islands, as their populations continue to decline and the unrelenting forces of the bay threaten the working working waterfronts that have sustained the communities for centuries. Fleming hopes that his photography will immerse readers in the *Island Life*

Author Jamie L.H. Goodall introduces infamous men like Edward "Blackbeard" Teach and "Black Sam" Bellamy, as well as lesser-known local figures like Gus Price and Berkeley Muse, whose tales of piracy are legendary from the harbor of Baltimore to the shores of Cape Charles.

What does the future hold for us? Divided into four accessible sections, *Beyond the Known* examines major periods of discovery and rediscovery, from Classical Times, when Phoenicians, Persians, and Greeks ventured forth; to The Age of European Exploration, which saw colonies sprout on nearly every continent; to The Era of Scientific Inquiry, when researchers developed new tools for mapping and traveling farther; to Our Spacefaring Future, which unveils plans currently underway for settling other planets and, eventually, traveling to the stars. A Mission Manager at SpaceX with a lively voice, Andrew Rader is at the forefront of space exploration. As a gifted historian, Rader, who has won global acclaim for his stunning breadth of knowledge, is singularly positioned to reveal the story of human exploration that is also the story of scientific achievement. "These are the 'know your value' conversations that we need to have. These women--their challenges, choices, and successes--are all of us." --Mika Brzezinski

Over the last sixty years, women's lives have transformed radically from generation to generation. Without a template to follow--a way to peek into the future to catch a glimpse of what leaving this job or marrying that person might mean to us decades from now--women make important decisions blindly, groping for a way forward, winging it, and hoping it all works out. As they faced unexpectedly fraught decisions about their own lives, journalists Hana Schank and Elizabeth Wallace found themselves wondering about the women they'd graduated alongside. What happened to these women who seemed set to reap the rewards of second-wave feminism, on the brink of taking over the world? Where did their ambition lead them? So they tracked down their classmates and, over several hundred hours of interviews, gathered and mapped data about real women's lives that has been missing from our conversations about women and the workplace. Whether you're deciding if you should pass up a promotion in favor of more flex time, planning when to get pregnant, or wondering what the ramifications are of being the only person in your house who ever unloads the dishwasher, *The Ambition Decisions* is a guide to the changes that may seem arbitrary but are life defining, by women

who've been there. Organized by theme, each chapter draws on real women's stories of facing down crisis, transition, and decision-making to illustrate broader trends Schank and Wallace observed. Each chapter wraps up with a useful bulleted list of questions to consider and tips to integrate that will guide women of all ages along the way to finding purpose and passion in work and life.

This book is about the PC Patrol Craft that fought in World War II. Almost 50,000 men served on 361 of them. Even so, PCs received little acclaim. One naval historian called them 'The Forgotten Fleet'. So that the world will not forget them, the author, a former PC sailor wrote this book. He tells the story of PCs in World War I and draws from his and his shipmates' experiences and memories. He uses old photos and drawings and from them describes what life was like for 65 men crowded aboard these small ships. He portrays the fearful times when tossed and torn by raging seas. He recounts the terrifying battles against submarines and kamikazes and when leading landing craft to the invasion beaches. To stay current with their profession, speech-language, and hearing clinicians and students must have a strong working knowledge of genetic disorders and their associated symptoms. Dr. Shprintzen's comprehensive manual provides a clear, understandable overview of human genetics and the modes of inheritance directly related to communicative disorders, as well as the proper methodology taking a detailed medical, behavioral, and genetic history for diagnosis, treatment, and prognosis.

Edmondo De Amicis (1846 - 1908) was an Italian novelist, journalist, poet and short-story writer. His best-known book is *Cuore*, a children's novel translated into English as *Heart*. De Amicis fought in the battle of Custoza during the Third Independence War, a defeat of Savoy forces against the Austrian Empire. In Florence, he wrote his first sketches dealing with his frontline experience, collected as *La vita militare* ("Military Life", 1868), and first published by the journal of the Ministry of Defense, *L'Italia Militare*. In 1870, he joined the staff of the journal *La Nazione* in Rome, and his correspondence at the time later served as base for his travel writings: *Spagna* (1873), *Olanda* (1874), *Ricordi di Londra* (1874), *Marocco* (1876), *Constantinople* (1878), *Ricordi di Parigi* (1879).

Throughout my life, I was extremely fortunate to have met many of the good people that G-d placed on this earth and avoided most of the folks that he should take back and reprogram. For those persons that I came to respect and love they will always be referred to by their real names. To the best of my knowledge, not one of them has an outstanding warrant or owes me money so I have no reason not to include them in my story. Persons for whom I only use initials are very few and are only mentioned in reference to a humorous incident. Besides, Kim Young, master counselor and part of our family, insists that no one needs to mention a negative about someone as it is probably already common knowledge.
