In response to ETA's 1997 kidnappings and murders thousands of Spaniards attended mass demonstrations to express their contempt for violence as a means of political pressure. The demand that public authorities prosecute and condemn those who directly or indirectly support ETA and its terrorist attacks was one of the most prevalent slogans in the marches. Indeed, the social response was aimed not only against the terrorist group, but also against Herri Batasuna (HB), the political party that openly endorse ETA's armed actions in the Basque Country. From the legal point of view, it is interesting to examine what it is citizens are requesting from the government in the above-mentioned case. How do these collective claims translate into legal language? One may think it fit to answer that Spanish citizens want violence to be met with the institutional punishment prescribed by the legal order. Nonetheless, it could also be argued that citizens in fact demand that certain kinds of behaviour be regulated by the law in their country. While from the latter viewpoint citizens wish for the creation

of new legal norms, from the former they are just calling for the application of the law. What reasons may render us inclined to sympathise with one of these two views rather than the other? Which one of these two options is most appropriate? At first sight, this may appear to be a simple question.

The producer price index (PPI) measures the rate at which the prices of producer goods and services are changing overtime. It is a key statistic for economic and business decision making and inflation monitoring. The Producer Price Index Manual: Theory and Practice provides clear, up-to-date guidance on the concepts, uses, methods, and economic theory of the PPI, including information on classifications, sources, compilation techniques, and analytical uses of the PPI. The Manual supersedes the previous international guidance on PPIs (available in the Manual on Producers' Price Indices for Industrial Goods, published by the United Nations Statistics Division in 1979). The Manual's conceptual framework derives from the System of National Accounts 1993 and recent developments in index number theory. Preparation of the Manual was undertaken by the Intersecretariat Working Group on Price Statistics through a technical expert group chaired by the IMF and involving representatives from the ILO, the OECD, the UN Economic Commission for Europe, the World Bank, national statistical offices, and academic institutions.

A comprehensive review of advances in one of today's most technologically important research fields. Spurred on by society's increasingly urgent demand for an inexpensive, environment-friendly alternative to the internal combustion engine, research into electrocatalytic fuel cells has yielded many exciting advances in the past few years. This rapid rate of progress, however, has

created a daunting challenge for anyone attempting to track the important new trends in electrocatalysis by sorting through the huge and rapidly growing body of world literature in the field. Electrocatalysis was designed to save scientists hours of arduous legwork by providing an authoritative review of the most important recent advances in all technologically relevant aspects of electrocatalysis. Leading researchers from North America, Europe, and the Far East share what they know about an array of related topics, including:

- \* Electrocatalysis of hydrogen and oxygen electrode reactions
- \* Electrooxidation of small organic molecules
- \* Design and synthesis of new electrocatalytic materials
- \* The distribution and storage of hydrogen in metal hydrides
- \* Hydrogenation of organic compounds as a means of hydrogen storage
- \* Electron, ion, and atom transfer reactions
- \* Influence of the double-layer structure on the rate of charge transfer
- \* A unified theory of electron and ion transfer reactions at metal electrodes.

Electrocatalysis is an indispensable working resource for electrochemists, chemical engineers, surface scientists, and materials scientists.
