Learning Russian is an exciting challenge-even saying "hello" "goodbye" seems daunting! Whether you're planning a trip to Russia or adding a valuable second language to your resume, this book is just what you need. Julia Stakhnevich, a native Russian speaker, will help you to: Recognize and read Cyrillic letters Pronounce Russian words like a native Ask for directions, order dinner, and conduct business Hold your own in a conversation Also, this eBook is enhanced with audio icons throughout which allow you to hear correct pronunciation or participate in various exercises so you can perfect your Russian pronunciation and understanding with ease! Inside, you'll also find step-by-step lessons in vocabulary, grammar, and conversation. With The Everything Learning Russian Book (Enhanced Edition), you'll see how much fun learning Russian can be! With recent advances in natural language understanding techniques and far-field microphone arrays, natural language interfaces, such as voice assistants and chatbots, are emerging as a popular new way to interact with computers. They have made their way out of the industry research labs and into the pockets, desktops, cars and living rooms of the general public. But although such interfaces recognize bits of natural language, and even voice input, they generally lack conversational competence, or the ability to engage in natural conversation. Today's platforms provide sophisticated tools for analyzing language and retrieving knowledge, but they fail to provide adequate support for modeling interaction. The user experience (UX) designer or software developer must figure out how a human conversation is

organized, usually relying on commonsense rather than on formal knowledge. Fortunately, practitioners can rely on conversation science. This book adapts formal knowledge from the field of Conversation Analysis (CA) to the design of natural language interfaces. It outlines the Natural Conversation Framework (NCF), developed at IBM Research, a systematic framework for designing interfaces that work like natural conversation. The NCF consists of four main components: 1) an interaction model of "expandable sequences," 2) a corresponding content format, 3) a pattern language with 100 generic UX patterns and 4) a navigation method of six basic user actions. The authors introduce UX designers to a new way of thinking about user experience design in the context of conversational interfaces, including a new vocabulary, new principles and new interaction patterns. User experience designers and graduate students in the HCI field as well as developers and conversation analysis students should find this book of interest.

In a fast-moving era of increased international competition, frontier markets must devise innovative ways to meet demanding sales targets and maintain profitability. These efforts will only succeed when local businesses abandon the concept of sales as a checklist of persuasive arguments that lead a customer to make a purchase and accept that building enduring customer relationships is the key to achieving sales goals. To understand what it means to sell successfully, sales representatives must develop a solid foundation in selling skills and an understanding of the critical elements needed to achieve sales goals. By delving into the foundational concepts related to leveraging sales as a tool for organisational profit, the authors give readers important insights into the critical elements of the sales process, including consultative selling, sales force management, qualities of effective leadership in sales, and the use of technological tools such as Customer Relationship Management (CRM) and Sales Force Automation (SFA) systems. This book includes insightful contributions from leading sales and marketing practitioners across the continent of Africa on characteristics of successful salespeople and how to recruit them, the crucial role of sales leadership, sales team training methods and strategies for developing customer relationship management programs. Case studies tie theory to practice and short quizzes help readers test their understanding of the material. Written in an accessible and reader-friendly format, this book is primarily aimed at undergraduate students with a secondary audience comprised of postgraduate students and business practitioners. ENDORSEMENTS: "Successful corporate marketing strategies are formulated around the delivery of value to consumers while maintaining a competitive advantage. Sales Management: A Primer for Emerging Markets offers innovative ways to locate, nurture, and develop long-term win-win relationships with key stakeholders. Readers will be rewarded with achievable concepts that will lay the foundation for developing a pattern of profitable sales. Highly recommended for undergraduate and graduate students as a well-crafted textbook drawing on real-world experience, for academicians as a reliable teaching tool, and for practitioners in the world of business seeking tested guidelines for marketing success." ~ Amon Chizema, Professor of Corporate Governance & Strategy; Birmingham Business School; University of Birmingham, UK "Sales Management: A Primer for Frontier Markets is a "must read" for future and current managers seeking innovative strategies for ensuring long-term repeat business with customers and consumers while maintaining a sustainable competitive advantage. Discussions on consultative selling, the role of ethics in sales, and the stages of the personal selling process have been specifically detailed and grounded in peer-reviewed case-study findings. A highly recommended read for undergraduate and graduate students, academicians, and business managers pursuing up-to-date insights into selling, customer service, marketing management, small business management, and retailing." ~ Patrick Awotwi, Commercial Director; The Coca-Cola Bottling Company of Ghana and Author of "Consider it Sold: A Seller's Point of View"

Playing for Keeps in Stocks and Futures offers traders three winning strategies for trading stocks and futures under any market condition and within any timeframe-from one minute to one month. Tom Bierovic details his newly developed trading strategies-First Prize, R2D2, and Triple Play-and shows you how to integrate them with various technical indicators and analytical techniques

to create low-risk, high-reward trading opportunities. Bierovic clearly explains the development of each system, lists the rules, and provides real-world examples from a wide variety of stocks and futures in several timeframes to illustrate how and why each strategy works so well. With these lessons, you'll quickly learn how to use Bierovic's original strategies to enter, manage, and exit your trades profitably. This complete guide to stock and futures trading opens with a brief introduction to price swings, impulse waves, corrective waves, and critical points and explains how the extreme and continuous variation in the duration and magnitude of price swings makes it possible for traders to speculate profitably. It also reveals the three components of a complete trading strategy—setups, entries, and exits—and how you should use them when trading with First Prize, R2D2, or Triple Play. Before entering into an in-depth discussion of these three winning trading strategies, *Playing for Keeps in Stocks and Futures* explains the tools used in them including: breakouts to new highs and lows, directional movement index spread (DMI spread), exponential moving averages (EMAs), Fibonacci retracement zones, Japanese candlestick charts, moving average convergence-divergence (MACD), parabolic stops, trendlines, true range and average true range (ATR). In explaining his three new trading strategies—First Prize, R2D2, and Triple Play—Bierovic breaks down each strategy into its setup, entry, and exit components and illustrates how to implement each strategy through charts, graphs, and vivid examples from both the stock and futures markets. Most importantly, you'll learn the unique qualities of each strategy and understand how the three strategies taken together can profit in any market conditions. (First Prize trades first pullbacks; R2D2 trades subsequent pullbacks; Triple Play trades trend reversals.) Take advantage of the tremendous opportunities offered to you by trading with First Prize, R2D2, and Triple Play. With these three strategies in your trading arsenal, you too will soon be playing for keeps in stocks and futures. Tom Bierovic, President of the Synergy Trading Group, has been trading stocks and futures successfully since 1971. Tom is also a popular and respected speaker: he has presented highly rated seminars on technical analysis and trading at major conferences throughout the United States and in more than 40 countries on six continents. *Futures magazine*, *Futures World News*, and *Technical Analysis of Stock & Commodities magazine* have all published in-depth interviews with Tom, and he is featured in the book *Real People, Real Traders* by Ruggiero and Toghraie. For information on products and services offered by the Synergy Trading Group, you can contact Tom by e-mail at tbierovic@aol.com. Study Guide for College Algebra is a supplemental material for the basic text, College Algebra. Its purpose is to make the learning of college algebra and trigonometry easier and enjoyable. The book provides detailed solutions to exercises found in the text. Students are encouraged to use the study guide as a

learning tool during the duration of the course, a reviewer prior to an exam, a reference book, and as a quick overview before studying a section of the text. The Study Guide and Solutions Manual consists of four major components: basic concepts that should be learned from each unit, what was learned upon completion of each unit, solutions to selected problems, and a short chapter quiz, including the answers, covering the concepts and problem types. College level students will find the book very useful.

Finally, a fresh and unique approach to reading the Bible for the millions of Catholics who don't know where to begin . . . Joe Paprocki, a veteran catechist and Bible authority, guides readers into a basic understanding of "God's Library"-the collection of seventy-three books that Catholics regard as the definitive written revelation of God. In easy-to-understand language, he explains the organization of the Bible, the different genres of biblical writing, key figures in biblical history, and the methods Catholics have developed to interpret the Bible properly. He shows beginners how to use commentaries, concordances, footnotes and cross-references, and other valuable tools of Bible study. Eight bookmarks are included to help readers locate the primary sections of the Bible. "[A] fine, accessible, and useful first introduction into Holy Scripture." - Walter Brueggemann, emeritus professor of Old Testament, Columbia Theological Seminary " Paprocki has contributed a valuable and welcome addition to the repertoire of materials available to the lay reader who is just beginning to explore the Bible. God's Library is a sure and trustworthy guide." -Rev. Donald Senior, CP President, Catholic Theological Union

Reviews the key concepts of biology and includes two full-length practice tests. A highly informative yet fun approach to understanding the world's all-time best-selling book It's pretty hard to build a house if you don't know how to read a blueprint. In the same way, it's difficult to develop your faith if you don't know how to read the Bible—or are reluctant even to open it. In *The Bible Blueprint*, best-selling author and popular speaker Joe Paprocki cleverly uses a blueprint metaphor to help Catholics gain a solid understanding of the structure and organization of the Bible, and to help them build confidence in navigating its pages. Among other topics, Paprocki covers the different genres of biblical writing, key figures in biblical history, and the methods Catholics rely on to interpret the Bible. Readers are also shown how to consult commentaries, concordances, and other valuable tools of Bible study to deepen their understanding of God's Word. Witty cartoons, sidebars, and quizzes throughout the book keep the tone fun and engaging; eight perforated Bible bookmarks are bound into the book. For the large number of Catholics who have never felt comfortable with the Scriptures, and for any Catholic new to the faith, *The Bible Blueprint* serves as an effective, nonthreatening introduction to God's Word, as well as a gateway to a deeper relationship with Christ.

Course Description: Taking Back Astronomy: Take a breathtaking look at the universe in this comprehensive guide to the heavens! Sit back and explore the

world at your fingertips. This book explains the scale and size of the universe that is hard for our minds to imagine, yet can only indicate the Master's hand at work. Marvel at over 50 full-color, rarely seen photos of stars, nebulae, and galaxies. Study the facts that challenge secular theories and models of the universe-how it began and how it continues to amaze the scientific community. Explore numerous evidences that point to a young universe: magnetic poles of planets, the spiral shape of galaxies, comets and how long scientists think they can last, and much more. Step out among the stars and experience the truly awesome power of God through this glimpse of His vast creation. Our Created Moon: For eons the moon has intrigued humanity. From its creation through the current issues of space exploration the moon has been both a light in the night and a protective shield of earth placed perfectly by God, regulating our seasons and keeping our atmosphere purified. Billions of dollars have been spent to reach its surface and discover its secrets; open these pages and discover those secrets for yourself. The Stargazer's Guide to the Night Sky: Explore the night sky, identify stars, constellations, and even planets. Stargaze with a telescope, binoculars, or even your naked eye. Allow Dr. Jason Lisle, a research scientist with a masters and PhD in astrophysics, to guide you in examining the beauty of God's Creation with 150 full color star-charts. Learn the best ways and optimal times to observe planets and stars with easy to use illustrations. Create or expand the hobby of stargazing; an outdoor, educational hobby to enjoy with friends or family. Our Created Moon DVD: In this illustrated presentation, Dr. Don DeYoung looks at four of the most popular ideas evolutionists have to offer regarding the moon's origin, and logically concludes that this "lesser light" could only have been placed in its orbit by an all-knowing, all-powerful Creator. Created Cosmos DVD: Our universe is truly an amazing thing. The vastness of space boggles the mind, and the beauty of diversity we find there points to a Creator. The Psalmist wrote, "When I consider Your heavens, the work of Your fingers, the moon and the stars, which You have ordained, what is man that You are mindful of him, and the Son of man that You visit him?" Take a tour through the universe during this awe-inspiring presentation.
