An extraordinary new novel from Jasmine Warga, Newbery Honor–winning author of *Other Words for Home*, about loss and healing—and how friendship can be magical. Cora hasn't spoken to her best friend, Quinn, in a year. Despite living next door to each other, they exist in separate worlds of grief. Cora is still grappling with the death of her beloved sister in a school shooting, and Quinn is carrying the guilt of what her brother did. On the day of Cora's twelfth birthday, Quinn leaves a box on her doorstep with a note. She has decided that the only way to fix things is to go back in time to the moment before her brother changed all their lives forever—and stop him. In spite of herself, Cora wants to believe. And so the two former friends begin working together to open a wormhole in the fabric of the universe. But as they attempt to unravel the mysteries of time travel to save their siblings, they learn that the magic of their friendship may actually be the key to saving themselves. *The Shape of Thunder* is a deeply moving story, told with exceptional grace, about friendship and loss—and how believing in impossible things can help us heal.

[It has not been optimized for devices that display only in black and white.] From the National Book Award finalist Lauren Redniss, author of *Radioactive*, comes a dazzling fusion of storytelling, visual art, and reportage that grapples with weather in all its dimensions: its danger and its beauty, why it happens and what it means. Weather is the very air we breathe—it shapes our daily lives and alters the course of history. In *Thunder & Lightning*, Lauren Redniss tells the story

of weather and humankind through the ages. This wide-ranging work roams from the driest desert on earth to a frigid island in the Arctic, from the Biblical flood to the defeat of the Spanish Armada. Redniss visits the headquarters of the National Weather Service, recounts top-secret rainmaking operations during the Vietnam War, and examines the economic impact of disasters like Hurricane Katrina. Drawing on extensive research and countless interviews, she examines our own day and age, from our most personal decisions—Do I need an umbrella today?—to the awesome challenges we face with global climate change. Redniss produced each element of *Thunder & Lightning*: the text, the artwork, the covers, and every page in between. She created many of the images using the antiquated printmaking technique copper plate photogravure etching. She even designed the book's typeface. The result is a book unlike any other: a spellbinding combination of storytelling, art, and science. Praise for *Thunder & Lightning* “[An] aesthetically charged and deeply researched account . . . a wild rainstorm of a book, pelting the reader with ideas and inspiration.”—*Nature* “A gorgeous and illuminating illustrated study of weather in all its tempestuous variety . . . Redniss’s combo of fact, folklore, and vibrant etched copperplate prints enthralls.”—*O: The Oprah Magazine* “Eerily beautiful . . . Contains plenty of scientific explanation (including more than a

few nods toward global warming), but also far-flung personal stories that illuminate the beauty, wonder and chaos inherent in the elements.”—The New York Times “Magical . . . Redniss has . . . shown us how human beings live with nature—fighting, coexisting, taming, predicting via leech barometer and radar and intuition.”—The New York Times Book Review “[A] twenty-first-century genius . . . The reader willing to put herself fully in Redniss’s hands will be rewarded with a delicious feeling of being enveloped by a phenomenon that eclipses the chiming trivialities of daily life.”—Elle “Redniss is one of the most creative science writers of our time—her combination of beautiful artwork, reporting, and poetic prose brings science to life in ways that words alone simply cannot.”—Rebecca Skloot “Redniss combines her own dual punch of expressive art and impressive erudition to give an entirely new take on all that happens above our heads.”—Adam Gopnik “A strange and wonderful thing, the work of a first-class mind that refuses to submit to any categories or precedent.”—Dave Eggers

Telepathic children hold the fate of humanity in their hands in this “compulsively readable novel” from the Hugo Award–winning author of *Stand on Zanzibar* (The Washington Post). In *Children of the Thunder*, Brunner creates another near-contemporary vision of

a world gone awry and proposes a peculiarly disturbing and frightening solution. Starting separately, a small number of very smart and uniquely talented children, none more than fourteen years old, create lucrative designer drugs, kill a Marine commando in unarmed combat, run a sex-ring of chilling depravity. None of them are even punished for their crimes. Combine powers of mental control and irresistible suggestion with creative and completely amoral intelligence and you have the recipe for a super-race of world-savers—or for the subjugation of all humanity to a new form of collective evil. “One of the most important science fiction authors. Brunner held a mirror up to reflect our foibles because he wanted to save us from ourselves.” —SF Site

Dr James Hansen, the world's leading scientist on climate issues, speaks out for the first time with the full truth about global warming: the planet is hurtling to a climatic point of no return. Hansen - whose climate predictions have come to pass again and again, beginning in the 1980s when he first warned US Congress about global warming - is the single most credible voice on the subject worldwide. He paints a devastating but all-too-realistic picture of what will happen if we continue to follow the course we're on. But he is also a hard-headed optimist, and shows that there is still time to take the urgent,

Jean E. Pendziwol's newest picture book is a lyrical meditation on nature and hope. The child in this story observes the sun by playing with her shadow, though sometimes it disappears. She listens to the wind tell stories, even when it howls like wolves. She tastes snowflakes — sometimes sweet and delicate; other times sharp on her cheeks. And finally, she finds hope in the buds on a cherry tree that survive through the winter to blossom in spring. Jean E. Pendziwol has written a layered, lyrical exploration of the hardships and beauties of nature. Her poem, beautifully illustrated by Nathalie Dion, is a study in contrasts and a message of the hope that carries us through the year and through our lives. Follow Greta as she faces her fears... Greta can't stop thinking all day long about the dark cloud that seems to be following her. Finally forced to confront the storm that follows, she learns it brings good things, too. Character building book for ages 3-7. Not just for children who are afraid of storms... This story is a wonderful example of a child dealing with fear and anxiety. It stresses preparedness. It also shows that some scary situations can't be avoided and that reward follows doing hard things. What people are saying... "I liked that the teacher did not coax or coddle the little girl. Fear is often irrational, and that sort of thing doesn't usually work.

Greta is forced out into the storm against her will, and as distressing as that is, she manages, and enjoys playing in the puddles afterward." ~A. Monaghan, Sioux Falls, SD "...a good conversation starter for parents and children" ~P. Wu, Jacksonville, FL "It illustrates how fear and anxiety plague the mind, and the uselessness of it.

Greta shows fortitude." ~F. Biernat, Windsor, ON
