Following discussions on scientific biography carried out over the past few decades, this book proposes a kaleidoscopic survey of the uses of biography as a tool to understand science and its context. It offers food for thought on the role played by the gender of the biographer and the biographee in the process of writing. To provide orientation in such a challenging field, some of the authors have accepted to write about their own professional experience while reflecting on the case studies they have been working on. Focusing on (auto)biography may help us to build bridges between different approaches to men and women's lives in science. The authors belong to a variety of academic and professional fields, including the history of science, anthropology, literary studies, and science journalism. The period covered spans from 1732, when Laura Bassi was the first woman to get a tenured professorship of physics, to 2009, when Elizabeth H. Blackburn and Carol W. Greider were the first women's team to have won a Nobel Prize in science.

The concept of a 'return to Europe' has been integral to the movement for Ukrainian national rebirth since the nineteenth century. While the goal of a more fully reformed politics remains elusive, numerous expressions of Ukrainian culture continue to develop in the European spirit. This wide-ranging book explores Ukraine's European cultural connection, especially as it has been reestablished since the country achieved independence in 1991. The contributors

discusses many aspects of Ukraine's contemporary culture - history, politics, and religion in Part I; literary culture in Part II; and language, popular culture, and the arts in Part III. What emerges is a fascinating picture of a young country grappling with its divided past and its colonial heritage, yet asserting its voice and preferences amid the diverse and at times conflicting realities of the contemporary political scene. Europe becomes a powerful point of reference, a measure against which the situation in post-independence Ukraine is gouged and debated. This framework allows for a better understanding of the complexities deeply ingrained in the social fabric of Ukrainian society.

Society is now facing challenges for which the traditional management toolbox is increasingly inadequate. Well-grounded theoretical frameworks, such as systems thinking and cybernetics, offer general level interpretation schemes and models that are capable of supporting understanding of complex phenomena and are not impacted by the passage of time. This book serves the knowledge society to address the complexity of decision making and problem solving in the 21st century with contributions from systems and cybernetics. A multi-disciplinary approach has been adopted to support diversity and to develop inter- and trans-disciplinary knowledge within the shared thematic of problem solving and decision making in the 21st century. Its conceptual thread is cyber/systemic thinking, and its realisation is supported by a wide network of scientists on the basis of a highly participative agenda. The book provides a platform of knowledge sharing and conceptual frameworks developed with multi-disciplinary perspectives, which are useful to better understand the fast changing scenario and the complexity of problem solving in the present time.

The Student Solutions Manual includes solutions to selected problems in the book.

The final chapter in the electrifying Stockholm Noir Trilogy, which has been translated into more than thirty languages worldwide: here is the no-holds-barred, rapid-fire tale of a supreme struggle for the legacy of the Swedish underworld, as the power, honor, and respect commanded by Stockholm's largest criminal organization are passed from father to daughter. Jorge was making a living as a drug dealer until he was caught and thrown into prison. Recently released and warned to keep out of trouble, he's already bored with his new existence: selling lattes and cappuccinos at a café. Who wouldn't be? But Jorge has a plan, and big money looms on the horizon if he can pull off one final audacious heist and flee the country before the police close in. Meanwhile, Deputy Inspector Martin Hägerström—entrusted with a secret mission, code name Operation Tide—has gone deep undercover as a disgraced cop turned corrections officer. He's slowly earning the trust of Stockholm's imprisoned expert money launderer, Johan Westlund. A career criminal with a taste for the jet-setting lifestyle, JW is a dangerous man to befriend, one who may demand more loyalty than Hägerström had planned on offering. Natalie is the twenty-two-year-old daughter of Radovan Kranjic, the Serbian crime boss who rules Sweden's underworld. When an

assassin threatens Radovan's life, Natalie is hurled into a chaotic struggle for control of her father's empire—and the competition is fierce. Who will rise to power in the voracious hunt for money, prestige, and luxury to become Stockholm's new king—or queen—of crime?

Three people in a marriage: a woman and two men. This was the eighteenth-century Italian aristocratic model of marriage, characterised by the presence of the *cicisbeo*, the official escort of another man's wife. Did this delineate a clear and brazen sexual depravity or rather a complex and refined social institution, revealing many aspects of Italian civilization in the Age of the Enlightenment? Not only was the presence of a *cicisbeo* part of a matrimonial, family model; it was also an important factor socially and politically. In a period in which the presence of women at parties was sought - at the theatre and in salons - the lady's escort played an essential part in promoting a couple's social life. Indeed, the company and friendship (and perhaps love) which bound a lady and her escort occurred with the knowledge and under the control of the families of the interested parties. Of course, this 'triangular' arrangement was not unproblematic. The existence of a third party posed a threat to conjugal fidelity and the legitimacy of offspring and, towards the early nineteenth century, when the ideals of Romanticism and the French Revolution were popular there was a rapid decline in the practice. For as Italy reconstructed its national identity alongside other modern European countries the image of private immorality associated with *cicisbeism* constituted an intolerable blemish. This book explores intersectional constructions of race and whiteness in modern and contemporary Italy. It contributes to transnational and interdisciplinary reflections on these issues through an analysis of political debates and social practices, focusing in particular on visual materials from the unification of Italy (1861) to the present day. Giuliani draws attention to rearticulations of the transnationally constructed Italian 'colonial archive' in Italian racialised identity-politics and cultural racisms across processes of nation building, emigration, colonial expansion, and the construction of the first post-fascist Italian society. The author considers the 'figures of race' peopling the Italian colonial archive as composing past and present ideas and representations of (white) Italianness and racialised/gendered Otherness. Students and scholars across a range of disciplines, including Italian studies, political philosophy, sociology, history, visual and cultural studies, race and whiteness studies and gender studies, will find this book of interest.

The Sicilian Mafia, or Cosa Nostra, is one of the most intriguing criminal phenomena in the world. It is an unparalleled organised criminal grouping that over almost two centuries has been able not only to successfully permeate licit and illicit economy, politics and civil society, but also to influence and exercise authoritative power over both the underworld and the upper-world. This criminal phenomenon has been a captivating conundrum for scholars of different disciplines who have tried to explain with various paradigms the reasons behind the emergence and consolidation of the mafia. Challenging the Mafia Mystique provides an analysis of the changes the Sicilian mafia has undergone, from legitimisation to denunciation. Rino Coluccello highlights how, from the very emergence of the organised criminal groups in Sicily, a culture existed that was protective and tolerant of the mafia. He argues that the various conceptualisations of the mafia that dominated the public and scientific debate in the nineteenth and more than half of the twentieth century created a mystique, which legitimised the mafia and contributed to their success. This book will be of great interest to scholars and students of organised crime, Italian politics and Italian literature.

It shows that after the 'Great War', not only did Italy establish itself as a regional power but also achieved its post-unification ambition to be recognised, at

anniversary of the Scandinavian Section of the University of Milan. A group of scholars working on different European and non-European cultural and literary traditions come together here to discuss the relationships between their areas of study and the Nordic countries. The range of the contributions expands over time and space, from the Middle Ages to the present day, from Poland in the east to the United States in the west, across various European countries.

Through various kinds of expertise and different perspectives, this intercultural discourse deals with diverse themes, including the perception of Nordic culture(s) by foreign writers as well as the image of other cultures in Scandinavian works. In particular, the literary and cultural interchange of models and ideas between the North and other areas is investigated in a number of essays devoted to numerous authors, including, among others, Klaus Bödl, Carmen de Burgos, Carlo Emilio Gadda, Gerhart Hauptmann, Henrik Ibsen, Stieg Larsson, Carl von Linné, Rainer Maria Rilke, J.D. Salinger, Henryk Sienkiewicz, Mme de Staël, August Strindberg, and Tomas Tranströmer.

Current grammatical knowledge about particular sign languages is fragmentary and of varying reliability, and it appears scattered in scientific publications where the description is often intertwined with the analysis. In general, comprehensive grammars are a rarity. The SignGram Blueprint is an innovative tool for the grammar writer: a full-fledged guide to describing all components of the grammars of sign languages in a thorough and systematic way, and with the highest scientific standards. The work builds on the existing knowledge in Descriptive Linguistics, but also on the insights from Theoretical Linguistics. It consists of two main parts running in parallel: the Checklist with all the grammatical features and phenomena the grammar writer can address, and the accompanying Manual with the relevant background information (definitions, methodological caveats, representative examples, tests, pointers to elicitation materials and bibliographical references). The areas covered are Phonology, Morphology, Lexicon, Syntax and Meaning. The Manual is endowed with hyperlinks that connect information across the work and with a pop-up glossary. The SignGram Blueprint will be a landmark for the description of sign language grammars in terms of quality and quantity.

the Russo-Japanese War in its military, diplomatic, social, political, and cultural context. In this volume East Asian contributors focus on the Asian side of the war to flesh out the assertion that the Russo-Japanese War was, in fact, World War Zero, the first global conflict of the 20th century. The contributors demonstrate that the Russo-Japanese War, largely forgotten in the aftermath of World War I, actually was a precursor to the catastrophe that engulfed the world less than a decade after the signing of the Treaty of Portsmouth. This study also helps us better understand Japan as it emerged at the beginning of its fateful 20th century.

This ebook is comprised of Hutton's 1788 paper 'Theory of the Earth', read before the Royal Society of Edinburgh, as well as Volumes 1 and 2 of his book of the same name. Although his books, filled with long quotes in French, make difficult reading, Hutton deserves to be better known as one of the makers of the modern view of the Earth.

This biography illuminates the life of Ennio De Giorgi, a mathematical genius in parallel with John Nash, the Nobel Prize Winner and protagonist of *A Beautiful Mind*. Beginning with his childhood and early years of research, into his solution of the 19th problem of Hilbert and his professorship, this book pushes beyond De Giorgi's rich contributions to the mathematics community, to present his work in human rights, including involvement in the fight for Leonid Plyushch's freedom and the defense of dissident Uruguayan mathematician José Luis Massera. Considered by many to be the greatest Italian analyst of the twentieth century, De Giorgi is described in this volume in full through documents and direct interviews with friends, family, colleagues, and former students.
