Described as a "forest of masts," San Francisco's Gold Rush waterfront was a floating economy of ships and wharves, where a dazzling array of global goods was traded and transported. Drawing on excavations in buried ships and collapsed buildings from this period, James P. Delgado re-creates San Francisco's unique maritime landscape, shedding new light on the city's remarkable rise from a small village to a boomtown of thousands in the three short years from 1848 to 1851. Gleaning history from artifacts—preserves and liquors in bottles, leather boots and jackets, hulls of ships, even crocks of butter lying alongside discarded guns—Gold Rush Port paints a fascinating picture of how ships and global connections created the port and the city of San Francisco. Setting the city's history into the wider web of international relationships, Delgado reshapes our understanding of developments in the Pacific that led to a world system of trading.

First published in 1998 to commemorate the sesquicentennial of Wisconsin statehood, this book has been updated to mark the Wisconsin Supreme Court's 150th anniversary and the 125th anniversary of the State Bar of Wisconsin, both celebrated in 2003. It contains profiles of all those who have served as Wisconsin Supreme Court justices and a new introduction by Chief Justice Abrahamson summarizing the court's history and its vision for the future. This book is an excellent reference for students, attorneys, and all interested in the state's legal history.

In her examination of the culture of Italian fascism, Mabel Berezin focuses on how Mussolini's regime consciously constructed a nonliberal public sphere to support its political aims. Fascism stresses form over content, she believes, and the regime tried to build its political support through the careful construction and manipulation of public spectacles or rituals such as parades, commemoration ceremonies, and holiday festivities. The fascists believed they could rely on the motivating power of spectacle, and experiential symbols. In contrast with the liberal democratic notion of separable public and private selves, Italian fascism attempted to merge the public and private selves in political spectacles, creating communities of feeling in public piazzas. Such communities were only temporary, Berezin explains, and fascist identity was only formed to the extent that it could be articulated in a language of pre-existing cultural identities. In the Italian case, those identities meant the popular culture of Roman Catholicism and the cult of motherhood. Berezin hypothesizes that at particular historical moments certain social groups which perceive the division of public and private self as untenable on cultural grounds will gain political ascendance. Her hypothesis opens a new perspective on how fascism works.

"Critical Models' combines two of Adorno's most important postwar works - 'Interventions' and 'Catchwords'--And addresses issues such as the dangers of ideological conformity, the fragility of democracy, educational reform, the influence of television and radio and the aftermath and continuity of racism.

The Challenge of Slums presents the first global assessment of slums, emphasizing their problems and prospects. Using a newly formulated operational definition of slums, it presents estimates of the number of urban slum dwellers and examines the factors at all level, from local to global, that underlie the formation of slums as well as their social, spatial and economic characteristics and dynamics. It goes on to evaluate the principal policy responses to the slum challenge of the last few decades. From this assessment, the immensity of the challenges that slums pose is clear. Almost 1 billion people live in slums, the majority in the developing world where over 40 per cent of the urban population are slum dwellers. The number is growing and will continue to increase unless there is serious and concerted action by municipal authorities, governments, civil society and the international community. This report points the way forward and identifies the most promising approaches to achieving the United Nations Millennium Declaration targets for improving the lives of slum dwellers by scaling up participatory slum upgrading and poverty reduction programmes. The Global Report on Human Settlements is the most authoritative and up-to-date assessment of conditions and trends in the world's cities. Written in clear language and supported by informative graphics, case studies and extensive statistical data, it will be an essential tool and reference for researchers, academics, planners, public authorities and civil society organizations around the world.

In Critique of Black Reason eminent critic Achille Mbembe offers a capacious genealogy of the category of Blackness—from the Atlantic slave trade to the present—to critically reevaluate history, racism, and the future of humanity. Mbembe teases out the intellectual consequences of the reality that Europe is no longer the world's center of gravity while mapping the relations among colonialism, slavery, and contemporary financial and extractive capital. Tracing the conjunction of Blackness with the biological fiction of race, he theorizes Black reason as the collection of discourses and practices that equated Blackness with the nonhuman in order to uphold forms of oppression. Mbembe powerfully argues that this equation of Blackness with the nonhuman will serve as the template for all new forms of exclusion. With Critique of Black Reason, Mbembe offers nothing less than a map of the world as it has been constituted through colonialism and racial thinking while providing the first glimpses of a more just future.

Lifeworlds of Islam shows that Islam has typically operated not in the form of standard dogmas, but more often as a compass for practical individual orientations or lifeworlds.

Mohammed Bamyeh develops a sociology of Islam that maps out how Muslims have employed the faith to foster global networks, public philosophies, and engaged civic lives both historically and in the present.

A critical investigation of international insurance fraud.

Since the General Agreement on Trade in Services (GATS) was created in 1995, there has been international pressure towards the liberalization of education all over the world, as well as new challenges to the traditional internationalization rationale in the field of higher education. Nevertheless, education liberalization under the GATS is also a contested process. Public universities, teachers unions, development NGOs and other education stakeholders have opposed and campaigned against the GATS in different countries and at a range of levels from local to global. Based on intensive fieldwork in the WTO headquarters and on two case studies (Argentina and Chile), Antoni Verger opens the black-box of the GATS negotiations in the field of education. His well-documented work explores in-depth how domestic actors and interests are key to understanding the constitution of the global education liberalization process entailed by the GATS as well as the opposition to this process in certain places. This book is crucial reading to anyone with an interest in the future of higher education.

The first full-length study of the impact of the discovery of the Americas on Italian Renaissance art and culture, Imagining the Americas in Medici Florence demonstrates that the Medici grand dukes of Florence were not only great patrons of artists but also early conservators of American culture. In collecting New World objects such as featherwork, codices, turquoise, and live plants and animals, the Medici grand dukes undertook a "vicarious conquest" of the Americas. As a result of their efforts, Renaissance Florence boasted one of the largest collections of objects from the New World as well as representations of the Americas in a variety of media. Through a close examination of archival

sources, including inventories and Medici letters, Lia Markey uncovers the provenance, history, and meaning of goods from and images of the Americas in Medici collections, and she shows how these novelties were incorporated into the culture of the Florentine court. More than just a study of the discoveries themselves, this volume is a vivid exploration of the New World as it existed in the minds of the Medici and their contemporaries. Scholars of Italian and American art history will especially welcome and benefit from Markey's insight.

Drawing on a rich trove of documents, including correspondence not seen for 300 years, this study explores the emergence and growth of a remarkable global trade network operated by Armenian silk merchants from a small outpost in the Persian Empire. Based in New Julfa, Isfahan, in what is now Iran, these merchants operated a network of commercial settlements that stretched from London and Amsterdam to Manila and Acapulco. The New Julfan Armenians were the only Eurasian community that was able to operate simultaneously and successfully in all the major empires of the early modern world—both land-based Asian empires and the emerging sea-borne empires—astonishingly without the benefits of an imperial network and state that accompanied and facilitated European mercantile expansion during the same period. This book brings to light for the first time the trans-imperial cosmopolitan world of the New Julfans. Among other topics, it explores the effects of long distance trade on the organization of community life, the ethos of trust and cooperation that existed among merchants, and the importance of information networks and communication in the operation of early modern mercantile communities.

Reflecting a diversity of thought and intellectual power, this unique volume provides undergraduate students with an important historical context and demonstrates the continuity of many issues in the fields of criminology and criminal justice. Commemorating the fiftieth anniversary of the American Society of Criminology, this volume contains previously published articles by the society's president-many of whom are the leading thinkers in the field. Articles examine the philosophy of punishment, policing, the politics of crime and crime control, criminological theory, drug use, white-collar crime, female crime, the study of deviance, parole, prediction studies, and criminal justice policy.

A comprehensive and state-of-the-art overview from internationally-recognized experts on white-collar crime covering a broad range of topics from many perspectives Law enforcement professionals and criminal justice scholars have debated the most appropriate definition of "white-collar crime" ever since Edwin Sutherland first coined the phrase in his speech to the American Sociological Society in 1939. The conceptual ambiguity surrounding the term has challenged efforts to construct a body of science that meaningfully informs policy and theory. The Handbook of White-Collar Crime is a unique re-framing of traditional discussions that discusses common topics of white-collar crime—who the offenders are, who the victims are, how these crimes are punished, theoretical explanations—while exploring how the choice of one definition over another affects research and scholarship on the subject. Providing a one-volume overview of research on white-collar crime, this book presents diverse perspectives from an international team of both established and newer scholars that review theory, policy, and empirical work on a broad range of topics. Chapters explore the extent and cost of white-collar crimes, individual- as well as organizational- and macro-level theories of crime, law enforcement roles in prevention and intervention, crimes in Africa and South America, the influence of technology and globalization, and more. This important resource: Explores diverse implications for future theory, policy, and research on current and emerging issues in the field Clarifies distinct characteristics of specific types of offences within the general archetype of white-collar crime Includes chapters written by researchers from countries commonly underrepresented in the field Examines the real-world impact of ambiguous definitions of white-collar crime on prevention, investigation, and punishment Offers critical examination of how definitional decisions steer the direction of criminological scholarship Accessible to readers at the undergraduate level, yet equally relevant for experienced practitioners, academics, and researchers, The Handbook of White-Collar Crime is an innovative, substantial contribution to contemporary scholarship in the field.

An anniversary edition of an influential book that introduced a groundbreaking approach to the study of science, technology, and society. This pioneering book, first published in 1987, launched the new field of social studies of technology. It introduced a method of inquiry—social construction of technology, or SCOT—that became a key part of the wider discipline of science and technology studies. The book helped the MIT Press shape its STS list and inspired the Inside Technology series. The thirteen essays in the book tell stories about such varied technologies as thirteenth-century galleys, eighteenth-century cooking stoves, and twentieth-century missile systems. Taken together, they affirm the fruitfulness of an approach to the study of technology that gives equal weight to technical, social, economic, and political questions, and they demonstrate the illuminating effects of the integration of empirics and theory. The approaches in this volume—collectively called SCOT (after the volume's title) have since broadened their scope, and twenty-five years after the publication of this book, it is difficult to think of a technology that has not been studied from a SCOT perspective and impossible to think of a technology that cannot be studied that way.

In this study, Mark Moberg examines the conflicts in Belize's ethnic and national identity by focusing on their effects and manifestations in the country's banana export industry.

"This is one of the best texts I have seen in a while...It makes the world of criminology less daunting and more relevant." —Allyson S. Maida, St. John's University Introduction to Criminology, Tenth Edition, is a comprehensive introduction to the study of criminology, focusing on the vital core areas of the field—theory, method, and criminal behavior. With more attention to crime typologies than most introductory texts, Hagan and Daigle investigate all forms of criminal activity, such as organized crime, white collar crime, political crime, and environmental crime. The methods of operation, the effects on society and policy decisions, and the connection between theory and criminal behavior are all explained in a clear, accessible manner. Contemporary Criminological Issues tackles some of today's most pressing social issues, from the criminalization of Indigenous peoples to interpersonal violence, border control, and armed conflicts. This book advances cutting-edge theories and methods, with the aim of moving beyond the scholarship that reproduces insecurity and exclusion. The breadth of approaches encompasses much of the current critical criminological scholarship, serving as a counterpoint to the growth of managerial and administrative criminologies and the rise of explicitly exclusionary and punitive state policies and practices with respect to 'crime' and 'security.' This edited collection featuring two books, one in English and one in French, includes important contributions to knowledge and public policy by eminent experts and emerging scholars. This book is published in English.

Christophe Picard recounts the adventures of Muslim sailors who competed with Greek and Latin seamen for control of the 7th-century Mediterranean. By the time Christian powers took over trade routes in the 13th century, a Muslim identity that operated within, and in opposition to, Europe had been shaped by encounters across the sea of the caliphs.

This study offers an authoritative and readable account of the hidden history of book theft in eighteenth-century London. It exploits a rich primary source, the compelling narratives of crime contained in the digitised Proceedings of the Old Bailey. The authors explain how cases of book theft came to court, and how in the ensuing trials the nature of the book itself became a question for legal debate. They assess the motives which led Londoners to steal books and the methods they employed in thefts from households and booksellers. Finally, the authors ask what the Proceedings tells us about the social ownership of books, and how the phenomenon of book theft differently affected book producers and consumers. Stealing Books in Eighteenth-Century London will appeal to readers interested in the connected histories of metropolitan life, crime, and the book in this period, and in the uses of digital resources in humanities research.

Profiles the top women cops and their rise to the top of their departments.

Crime and criminal typologies have not lived up to their 'promises' because criminologists have been unable to agree on the 'best' typology. Meier believes that the time is right to take stock. He has collated articles by ten leading social scientists, who show the great diversity of current criminality. The result is a valuable reference book covering subjects like victimization, criminal careers, theories of criminality, social and legal reactions to kinds of crime, and future research possibilities in criminology. It forms an ideal supplement to textbooks for advanced criminal justice, deviant behaviour, and criminology courses.
