People take great pride in flaunting their punishing work routines. The Seductive Illusion of Hard Work establishes that hard work is necessary but insufficient for success. In fact, misdirected hard work is way worse than no work at all. This book includes various real-life examples from the corporate world that has constantly exaggerated the role of hard work and underplayed the critical role of choices and mentorship in creating conditions for success. The young workforce is experiencing burnout and it is suspected that the romantic proclamations and obsession about hard work has lots to do with it. This book discusses all these issues and finally offers a solution-oriented approach to the myth about succeeding in work life.

This volume brings together papers by eminent scholars analyzing the sociological bases of Indian politics. It focuses on the relationship modern politics has with changes in caste structure, religious communities, and other types of identity.

The central Gujarat region of western India is home to the entrepreneurial landowning Patel caste who have leveraged their rural dominance to become a powerful global diaspora of merchants, industrialists, and professionals. Investigating the Patels' intriguing ascent, Vinay Gidwani analyzes its broad implications for the nature of labor and capital worldwide. With the Patels as his central case, Gidwani interrogates established concepts of value, development, and the relationship between capital and history. Capitalism, he argues, is not a frame of economic organization based on the smooth, consistent operation of a series of laws, but rather an assemblage of contingent and interrupted logics stitched together into the appearance of a deus ex machina. Following this line of

thinking, Gidwani points to ways in which political economy might be freed of its lingering Eurocentrism, raises questions about the adequacy of postcolonial studies' critique of Marx and capitalism, and opens the possibility of situating capitalism as a geographically uneven social formation in which different normative or value-creating practices are imperfectly sutured together in ways that can equally impair and enable profit and accumulation. Both theoretically astute and empirically informed, *Capital, Interrupted* unsettles encrusted understandings of staple concepts within the human sciences such as hegemony, governmentality, caste, and agency and, ultimately, does nothing less than rethink the very constitution of capitalism. Vinay Gidwani is associate professor of geography and global studies at the University of Minnesota. This new series provides an ideal platform to study chess openings. By continually challenging the reader to answer probing questions throughout the book, the Move by Move format greatly encourages the learning and practising of vital skills just as much as the traditional assimilation of opening knowledge. Carefully selected questions and answers are designed to keep you actively involved and allow you to monitor your progress as you learn. This is an excellent way to study any chess opening and at the same time improve your general chess skills and knowledge. The English Opening is a popular choice, from club level all the way through to world champions. Its flexibility allows players to choose from a number of different set-ups – positional or aggressive, classical or hypermodern. It also appeals to those who prefer learning opening ideas to memorizing reams of theory. In this book, Steve Giddins invites you to join him in studying the English and its many variations. He examines instructive games, covers the most important lines and provides answers to all the key questions. *Essential guidance and training in the English Opening* Utilizes an ideal approach to chess study *Discusses move orders and repertoire options
