Mendoza the Jew combines a graphic history with primary documentation and contextual information to explore issues of nationalism, identity, culture, and historical methodology through the life story of Daniel Mendoza. Mendoza was a poor Sephardic Jew from East London who became the boxing champion of Britain in 1789. As a Jew with limited means and a foreign-sounding name, Mendoza was an unlikely symbol of what many Britons considered to be their very own "national" sport.

SSCP Study Guide The 1,000,000 readers who have read previous Syngress Study Guides will find many familiar features in the Study Guide along with many new enhancements including: - Exercises: There will be frequent use of step-by-step exercises with many screen captures and line drawings. Exercises will be presented in sidebar-like style, and will run 1 to 2 pages. - Anatomy of a Question: Question types will be diagrammed and analyzed to give readers access to the theory behind the questions themselves. - Teacher's Pet: These will be written from the instructor's perspective and will provide insight into the teaching

methodologies applied to certain objectives that will give readers the "\$2,000 worth of training in a \$60 book feel." These will be presented in sidebar-like style and will run about 1 page.

- Objectives Fast Track: End of chapter element containing each A-head from the chapter and succinct bullet points reviewing most important information from each section (same as current Solutions Fast Track).

The accompanying Web site will provide students with realistic exam-simulations software. The exam will emulate the content and the look and feel of the real-exam. Students will be able to grade their performance on the Web-based exam and automatically link to the accompanying e-book for further review of difficult concepts

Ø \$2,000 worth of training in a \$60 book, DVD, and Web-enhanced training system. Consumers of this product will receive an unprecedented value. Instructor-led training for similar certifications averages \$2,000 per class, and retail DVD training products are priced from \$69 to \$129. Consumers are accustomed to paying 20% to 100% more than the cost of this training system for only the DVD!

Ø Changes to the CISSP

Certification pre-requisites will result in an increase in the popularity of the SSCP certification. Recently the (ISC)2 increased the work experience requirement of the CISSP certification to four years from three years. This increase will result into current candidates for the CISSP to shift to the SSCP certification, as the verifiable field requirement is only one year. Ø Syngress well-positioned in wide open playing field. The landscape of certification publishing has changed dramatically over the past month with Coriolis ceasing operations, Hungry Minds facing an uncertain future after their acquisition by John Wiley & Sons, and Syngress ending its long-term relationship with Osborne McGraw Hill in pursuit of publishing Study Guides independently. We are confident that Syngress' long history of best-selling Study Guides will continue in this new era.

This book examines new concept of evolutionary ontology based on the idea of radically different “ontic orders” – natural and cultural being. It explains how culture evolved out of nature and how it became “anti-natural”. The remedy is seen in the global biophilous reconstruction of culture. The value of the “live planet” Earth and the “subject” capable of creative activity and evolution are given fundamental philosophical interpretation.

It is often assumed that upstream land use practices have important impacts on water resources and affect the downstream users at a watershed scale, Payments by downstream users to upstream users for "environmental services" such as good water

quality, less sediments or more regular water flow are widely discussed. However, much controversy exists about the direction and magnitude of such impacts, how they influence the relationships between upstream and down-stream users, and which mechanisms allow for a sharing of resulting benefits and costs by all resource users in a watershed context. To address these issues, the FAO Land and Water Development Division organized the electronic workshop "Land-Water Linkages in Rural Watersheds" from 18 September to 27 October 2000. The present publication contains the proceedings of the workshop and two papers that set the stage for the workshop discussions. The complete workshop documentation, including discussion archive, background papers, and case studies, is included on the CD-ROM that accompanies the document.

Man and Horse is a magisterial history of the mounted warrior and the relationship with his steed. Andrew Sinclair takes as his inspiration Walter Prescott Webb's seminal work, *The Great Plains*. The horse until very recently has been the decisive factor in determining military success. Great exponents of the art of equestrian warfare include, Alexander the Great, Hannibal, King Arthur, Saladin, the Knights of the Templar, the Reivers of the Scottish Borders, the Mongols, North American Indians, the Confederate forces during the American Civil War and the Boers. Sinclair also explores the uses of the horse by highwaymen and figures such as Ned Kelly. Andrew Sinclair brilliantly shows that the art of warfare from horseback with its culture of mobility has always been at conflict with the urban domesticated culture. This tension has created much of the great art and culture of humankind. This is a hugely ambitious and

exhilarating book that cannot fail to enthral and stimulate.

The introduction of outcomes-based education has necessitated a change in the leadership structures within schools. New education policies have been introduced that are intended to delegate far more authority and responsibility for leadership and management to school leaders than has been the case before. This book draws on the Teacher In-service Project's experience of working with school leaders who have been engaged in the process of making the adjustment. It challenges school leaders to reflect critically on their own approaches to leadership. The book offers a learning process, rather than merely providing tips or describing facts. It is a companion text to *The Learning School*, as it offers a practical application of the theory and principles espoused in that text.

This book is designed to be the "one-stop shop" for security engineers who want all their information in one place. The technical nature of this may be too much for middle management; however technical managers can use the book to help them understand the challenges faced by the engineers who support their businesses.
