Elegant remnants of the Victorian era grace almost every corner of Cape May. Wealthy locals built opulent homes like the Emlen Physick Estate and the George Allen House, while grand hotels like Congress Hall and the Chalfonte welcomed visitors from around the country. Even presidents came for the healthful sea air and distinguished venues. Yet the gaities of these well-heeled patrons were shadowed by strictly defined social roles. Men and women--upper class, as well as cooks and servants--had vastly different experiences in this resort town. Local historian Robert Heinly explores all aspects of this world. Peer into the upstairs and downstairs of these majestic homes to discover what life was like in Victorian Cape May.

No safe harbours for steamboats or sailing vessels could be found along an isolated 70-mile stretch of eastern Lake Ontario, dominated by the irregular-shaped Prince Edward County peninsula. Frequent storms, rocky reefs and sandy shoals were among the many dangers facing 19th century mariners. So many shipwrecks mark one narrow and shallow underwater ridge in the region that it became known as the graveyard of Lake Ontario. It was on these shores, from Presquile Bay to Kingston harbour and along the Bay of Quinte, that a network of more than forty lighthouses and light towers was built between 1828 and 1914. FOR WANT OF A LIGHTHOUSE presents a sweeping look at the social and technological changes which marked the era, and brings to life the people, politics and hardships involved in the construction of these essential aids to navigation. Through the use of extensive archival material and more than 100 maps and photographs, Marc Seguin documents the vital role these lighthouses played in the building of a nation. There is now a race against time to save the few original towers that are still standing. All profits from the sale of this book will be used to preserve these remaining lighthouses.

The Rough Guide to Trinidad and Tobago is the definitive guide to these high-spirited twin islands. Interpreting Naval History at Museums and Historic Sites demonstrates the broad appeal of naval themed commemoration, centering on military aspects from both times of war and peace. Transcending place and time, naval history is shaped into public forums for modern day consumption. These occurrences are not limited to just recent history, as can be seen in the celebration of man's long history of transforming bodies of water from barriers into opportunities. In addition, with the modern day nation-state naval history is not just limited to areas near large bodies of water, as seen with landlocked states in the United States sharing in a proud naval tradition. Examples of this included in the book are USS Arizona, BB-39, and USS Missouri, BB-63.) Naval history is just one avenue, with sites marking the history of immigration, engineering technology, and architecture.. Naval history also extends into lighthouses and port facility construction which are the background of a host of U.S. Generals in the U.S. Army with the Army Corps of Engineers, which includes the Robert E. Lee. Using an international approach, the book illustrates the intersection of the historical understanding of one's place and naval traditions.

Locating the boundaries, one finds both the depth and breath of the topics linking (and dividing) water and man.

This vintage book contains D. H. Lawrence's 1922 collection of short stories, entitled "England, My England". Written between 1913 and 1921, many of the stories revolve around war and will appeal to those with an interest in related literature. The stories of this collection include: "England, My England", "Tickets, Please", "The Blind Man", "Monkey Nuts", "Wintry Peacock", "You Touched Me", "Samson and Delilah", "The Primrose Path", "The Horse Dealer's Daughter", "Fanny and Annie", and more. David Herbert Richards Lawrence (1885 - 1930) was a seminal English novelist, poet, essayist, playwright, and literary critic. Many vintage texts such as this are increasingly scarce and expensive, and it is with this in mind that we are republishing this book now, in an affordable, high-quality, modern edition. It comes complete with a specially commissioned biography of the author.

Vera Köpsel investigates the relevance of local perceptions of landscape and nature for the current topic of adaptation to climate change. She highlights the influence that differing conceptualisations of landscape among actors in environmental management have on their perspectives on climate change and adaptation. Qualitative empirical data from Cornwall (UK) constitutes a valuable foundation for an enhanced theoretical understanding of societal constructions of landscape and their implications for local negotiation processes. Using the example of coastal erosion, the author discusses how contrasting perceptions of a local landscape can significantly complicate consensus-finding around physical-material adaptation measures.

Lighthouses were built on the Hudson River in New York between 1826 to 1921 to help guide freight and passenger traffic. One of the most famous was the iconic Statue of Liberty. This fascinating history with photos will bring the time of traffic along the river alive. Set against the backdrop of purple mountains, lush hillsides, and tidal wetlands, the lighthouses of the Hudson River were built between 1826 and 1921 to improve navigational safety on a river teeming with freight and passenger traffic. Unlike the towering beacons of the seacoasts, these river lighthouses were architecturally diverse, ranging from short conical towers to elaborate Victorian houses. Operated by men and women who at times risked and lost their lives in service of safe navigation, these beacons have overseen more than a century of extraordinary technological and social change. Of the dozens of historic lighthouses and beacons that once dotted the Hudson River, just eight remain, including the iconic Statue of Liberty, New York Harbor's great monument to freedom and immigration, which served as an official lighthouse between 1886 and 1902. Hudson River Lighthouses invites readers to explore these unique icons and their fascinating stories.

In this easy to use, informative, and occasionally eccentric guidebook, David A. Steinberg blazes the trail to more than twenty-five unusual landmarks and hard-to-find destinations that are mostly within a two-hour drive of New York City. Suitable for the experienced hiker or camping adventurer—as well as anyone who has the desire to explore—Hiking the Road to Ruins includes many new ruins and historic sites to see: remnants of the two World’s Fairs in Queens, mysterious stone chambers scattered about northern Westchester County, winter adventuring in Harriman, and quarries that contain amazing artifacts. In this new edition, Steinberg adds four additional chapters and has revised throughout the book to include detailed directions, GPS coordinates to specific sites, a hand-drawn map, and suggestions for the optimal time and season to visit. Having led many types of hikes and trips over the past fifteen years, Steinberg leaves no part of the trip unplanned. He even suggests ideal conditions for outings. An overcast day, for instance, sets up the haunted atmosphere appropriate for visiting a water tower in Mountainside, New Jersey, that has links to a murder-suicide in the 1970s. Newcomers will gain experience as they make their way through the book, which includes a chapter on equipment and safety, detailed instructions on how to program a hand-held Global Positioning System receiver, and a glossary of terms. Both a practical guide and a creative chronicle, Hiking the Road to Ruins will inspire everyone to hit the trail in search of adventure.

This report explores the growth prospects for the ocean economy, its capacity for future employment creation and innovation, and its role in addressing global challenges. Special attention is devoted to the emerging ocean-based industries.

Lightships, Lighthouses and Lifeboat Stations is part history book, part memoir, written by Bernie Webber, recipient of the Coast Guard’s highest award, the Gold Life-saving Medal, and hero of the Disney movie The Finest Hours. While the public will recognize Webber’s name from the movie and the bestselling book by the same name, few people know that during his lengthy Coast Guard career he served on lightships (ships anchored in dangerous areas to warn other vessels of hazards) in addition to lifeboat stations (small boat rescue stations) and lighthouses. Webber poses the following question: “How did the lightship men cope with the isolation, constant loneliness, boredom, fear, or just sheer terror? All were part of life on board a lightship. Rough seas tossed the ship about, rearing up and down the anchor chain. This was a world of isolation, noise from operating machinery, and blasts from the powerful foghorn that went on for hours, sometimes days, at a time.” Webber answers that question in this book, drawing on a combination of personal experience and meticulous historical research. Discussions of men going mad, lightships being run down by larger ships, anchor chains breaking, and lightships cast upon shoals are offset with humorous stories and the author’s reflections on his best days at sea. Webber also explains some of the heroic actions of a few lightship men over the years, and points out that they received no recognition at the time. The isolation these men faced was intense, but they learned to make do with what they had. Fourteen historic photos are included, as well as a Foreword by Michael Tougas.

Bland Simpson regales us with new tales of coastal North Carolina's "water-loving land," revealing how its creeks, streams, and rivers shape the region's geography as well as its culture. Drawing on deep family ties and coastal travels, Simpson and wife and collaborator Ann Cary Simpson tell the stories of those who have lived and worked in this country, chronicling both a distinct environment and a way of life. Whether rhapsodizing about learning to sail on the Pasquotank River or eating oysters on Ocracoke, he introduces readers to the people and communities along the watery web of myriad "little rivers" that define North Carolina's sound country as it meets the Atlantic. With nearly sixty of Ann Simpson's photographs, Little Rivers joins the Simpsons' two previous works, Into the Sound Country and The Inner Islands, in offering a rich narrative and visual document of eastern North Carolina's particular beauty. Urging readers to take note of the poetry in "every rivulet and rill, every creek, crick, branch, run, stream, prong, fork, river, pocosin, swamp, basin, estuary, cove, bay, and sound," the Simpsons show how the coastal plain's river systems are in many ways the region's heart and soul.
