"This book reflects a breakthrough in American music studies, an unrecognized field among traditional musicologists until the past few decades, during which enormous progress has been made in documenting three centuries of American musical activities and figures. Time and effort had to be expended exclusively on the development of basic historical studies. The time has come for a new phase, one that can take a creative, interpretive approach. Professor Crawford's study will introduce this higher level of scholarship into the field of American music studies."—Vivian Perlis, author of *Charles Ives Remembered* "A major statement by a senior scholar on what American musicology is all about. . . These themes are also topical; they come at a time when much more research is being done in American music, but little thought is being given to the big picture, the vision, the philosophy, and the implications of historical research. Now is the time for a synthesis, and there are few scholars better equipped to do that in American music than Richard Crawford."—Michael Broyles, author of *Music of the Highest Class*

A collection of nostalgic automotive short stories by the author of the cult classic motorsports novels The Last Open Road and Montezuma's Ferrari. Very funny!

Taken by motor sports photographer Ian Catt, these historic images are an accumulation of twenty years of being at the right place at the right time, capturing the very essence of motor racing during this heady period. Working for a leading sponsor, John Player, Ian had the chance to capture a wide variety of Lotus cars both in motion on the track, as well as in the pits and paddock, where he could 'get up close' to both the cars and drivers.

MGF and TF Restoration Manual provides the MGF or TF owner with a complete workshop guide to mechanical and body restoration for the cars. With the MGF in production between 1995 and 2001, and the MG TF until 2011, many of the cars have survived in a structurally and mechanically sound state, without the huge costs and complications of needing a complete body restoration that is so often the case with pre-1980 MGs. Topics covered include: Model overview and parts supply; Workshop safety information; Bodywork [external and subframes]; Trim [including hood problems and replacement]; All mechanical components [including head gasket replacement]; Electrical systems [including security systems]; Modification [cosmetic, mechanical and engine]. An essential and practical workshop guide for all owners of these attractive sports cars. Gives instructions on minor repair and maintenance procedures and covers a full engine strip and rebuild. Covers workshop safety information, bodywork, trim, all mechanical components and much, much more. Features a number of different project cars. Superbly illustrated with approximately 1000 colour step-by-step photographs. Roger Parker is an acknowledged MGF and TS expert with years of restoration experience.

In this sequel to The last open road, Buddy Palumbo takes off for southern Mexico for the 1952 Carrera Panamericana and survives the "famous 12-hour endurance grind across the cracked concrete runways of Sebring, Florida."--Jacket. A Chernobyl survivor and award-winning historian "mercilessly chronicles the absurdities of the Soviet system" in this "vividly empathetic" account of the worst nuclear accident in history (The Wall Street Journal). On the morning of April 26, 1986, Europe witnessed the worst nuclear disaster in history: the explosion of a reactor at the Chernobyl Nuclear Power Plant in Soviet Ukraine. Dozens died of radiation poisoning, fallout contaminated half the continent, and thousands fell ill. In Chernobyl, Serhii Plokyh draws on new sources to tell the dramatic stories of the firefighters, scientists, and soldiers who heroically extinguished the nuclear inferno. He lays bare the flaws of the Soviet nuclear industry, tracing the disaster to the authoritarian character of the Communist party rule, the regime's control over scientific information, and its emphasis on economic development over all else. Today, the risk of another Chernobyl looms in the mismanagement of nuclear power in the developing world. A moving and definitive account, Chernobyl is also an urgent call to action. The all-color practical Build Your Own Sports Car provides all the information needed to build a road-going two-seater, open-top sports car on a budget, using standard tools, basic skills and low-cost materials. The down-to-earth text clearly explains each step along the road to producing a well-engineered, high-performance sports car, providing a learning experience in engineering and design - and opening up a whole new world of fun motoring. The Haynes Roadster, which has fully independent rear suspension, has been designed with the aid of CAD software to develop the chassis and suspension, resulting in a car with performance and handling to challenge many established kit cars and mainstream sports cars. The design is intended to make use of components sourced primarily from a Ford Sierra donor, although

alternative donors are mentioned.

The Lotus Elan was Colin Chapman and Lotus' first affordable road car, produced from 1962 and, along with its larger Plus 2 variant, until 1974. As a replacement for the expensive Lotus Elite, the Elan and Plus 2 were both successful sports cars, which carried Lotus through the 1960s and into the 1970s. Starting with a brief history of Lotus and the Elan, Lotus Elan & Plus 2 Source Book provides a detailed originality guide to the Elan and Plus 2, identifying the design changes Lotus made to the models through their lifetimes. An 'owner's guide' provides detailed information on owning and maintaining the cars in tip-top condition, and gives details of common faults and upgrades. The restoration guide gives any potential restorer the information to carry out the tasks needed to bring one of these cars back from the dead. With anecdotes and experiences from current and previous owners of Elans and Plus 2's, along with many colour photographs the book provides a valuable insight into owning running and racing these iconic cars.

Includes list and diagram of 1969 Motor Vehicle Safety Standards Areas.

The first Land Cruiser appeared at about the same time as the Land-Rover. Styling changes occurred in 1952 with the modern range designated F25s and F28s. The FJ43 appeared in the mid-1960s, the 40 and 45 Series in Australia in 1967/8. The FJ55 was introduced in 1969, the 43 series continued to be made in Japan and the 40 and 45 Series had improvements made throughout the 1970s. Production of the FJ55 ceased in 1980 to be followed by the Series 60. This was only available with an in-line, six-cylinder engine of 3980cc. A generous five-seater, and good load carrier, there were few changes made to it after production commenced. This is a book of contemporary road & comparison tests, new model introductions, technical & specification data, driving impressions, of road tests, long-term reports, buying second hand. Models covered include:- FWD Pick-up, Station Wagon, LX, De Luxe, Diesel.

In order to achieve the Army's envisioned Objective Force related to deployability, transportability, and mobility, the Committee on Lightweight Materials for the 21st Century Army Trucks was asked to identify research and technology development opportunities related to the introduction of new lightweight structural materials for light medium and heavy Army trucks.

Out of print for twenty years, a new edition of Jim Clark 'Tribute to a Champion' by Eric Dymock will be published in the spring. Lightly edited and completely redesigned in colour throughout, this eagerly sought classic of motor racing celebrates the life and

achievements of Jim Clark (1936-1968), World Champion 1963 and 1965. In the new book, Eric Dymock details his place in motor racing history and total command of Formula 1, portraying him as an individual, nail-biting and insecure, yet the greatest driver in any sort of motor sport. From a Scottish farming family Clark rewrote the annals of American racing at Indianapolis, coming second at his first attempt in 1963, winning in 1965. He seemed a match for any odds during eight dangerous years at the top of motor racing, yet died in an unlikely accident at a minor event at Hockenheim on April 7th 1968. Genius at the wheel was not enough. Rivals' subsequent safety campaigns saved countless lives on and off the track. Eric Dymock observed Clark from before he ever sat in a racing car, covering his professional career as member of The Motor magazine staff from 1962, and then as specialist motor racing correspondent from 1966. This book has photographs of Jim Clark's birthplace, home, memorabilia and archive material from the Jim Clark Room at Duns. The measured analysis throws light on the tense mood of Formula 1 in the hazardous 1960s when Clark narrowly missed four consecutive world titles. Misfortune in the closing laps of the final race of the season twice denied him a unique quartet. Some of his other records remain secure however. Clark's eight "grand slams" (pole position, leading every lap, fastest lap and winning a Grand Prix - his closest rivals Alberto Ascari and Michael Schumacher managed only five) is unlikely to be matched. The new edition will go on sale in the spring at regular bookshop prices for a new generation of Formula 1 fans, as the 50th anniversary of Clark's accident approaches.

The Bangernomics Bible is a crash course in buying and running a car for less. Bangernomics contrasts the absurd expense of buying new, with the supreme good sense of buying used. Bangernomics shows the mechanically bewildered how to buy and run a safe, durable car and save money. The Bangernomics Bible is universe friendly, so no matter where you live in the world the advice is always relevant. James Ruppert is the internationally recognised guru of Bangernomics and a full time automotive anarchist.

Every fascinating stage of the evolution of the stunning new Lotus Evora is explored in this fully comprehensive book, LOTUS EVORA - SUBLIME SUPERCAR. From its conception, through development, prototype testing, certification, production and on to the marketing of the car, every part of this captivating story is covered in depth. Produced with the full co-operation of Lotus Cars,

who once again gave Coterie Press exclusive access to their photo archives as well as their employees, this book contains the reminiscences of virtually everyone involved in the concept, design and development of the Evora. Author Johnny Tipler was the only journalist invited to see and drive the Evora before it was launched to the press and public. With unprecedented access and surprising candor, he is able to describe in detail all of the development stages, through to the construction of the first production examples, culminating in the car's press debut in Scotland. His close involvement with Lotus, and their obvious enthusiasm for the Evora project, is reflected by the openness of all involved who tell him the full story behind this stunning new car.

The Elise saw the return of the genuinely exciting sports car. This was the first Lotus for a generation truly to revive Colin Chapman's ideals, proving a worthy successor to the seminal Lotus 7. The Elise was the first modern sports car to generate real enthusiasm, tempting many classic car fans to change their allegiance to this no-compromise contemporary classic. This fully updated second edition, published in the Haynes Enthusiasts' Guide Series, brings the story right up to date to include Toyota-powered and supercharged cars. Essential reading for all Elise owners and enthusiasts.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

From the witty senior editor of Jalopnik, Gizmodo Media's acclaimed website devoted to cars, technology, and more, comes a revealing, savvy, and humorous look at self-driving cars. Self-driving cars sound fantastical and futuristic and yet they'll soon be on every street in America. Whether it's Tesla's Autopilot, Google's Waymo, Mercedes's Distronic, or Uber's 24,000 modified Volvos, companies across industries and throughout the world are developing autonomous cars. Even Apple, not to be outdone, is rumored to be creating its own technology too. In *Robot, Take the Wheel*, Jason Torchinsky explores the state of the automotive industry. Through wit and wisdom, he explains why autonomous cars are being made and what the future of automated cars is. Torchinsky encourages us to consider autonomous cars as an entirely new machine, something beyond cars as we understand them today. He considers how we'll get along with these robots that will take over our cars' jobs, what they will look like, what sorts of jobs they may do, what we can expect of them, how they should act, ethically, how we can have fun with them, and how we can make sure there's still a place for those of us who love to drive with manual or automatic transmission. This unique and highly readable volume is brimming with industry insider information and destined to be a conversation starter. It's a must-have for car lovers, technology geeks, and everyone who wants to know what's on the road ahead.

Most people tend to idealize artists, writers, and others of the "creative class" as uniquely gifted. But the capacity to create is part of being human—whether that means writing, making art, cooking, gardening, sewing, dancing, acting, singing, or virtually any activity. In *Chi and Creativity*, Kaleo Ching and Elise Dirlam Ching show readers how to use a wide range of strategies to harness the energy of chi to uncover, and cultivate, that often elusive inner artist. Based on their popular workshops, the authors offer an integrative process to generate the joy, wonder, and sense of well-being necessary for artistic self-expression. Specific exercises draw on everything from acupressure and breathing techniques to Chi Kung movement and meditation. Through Chi Awareness, the body, mind, emotions, and spirit come into greater harmony. Through guided imagery, they dialogue. Through journaling, they speak. Through art, they join in creative expression of the inner discoveries along the path to greater balance and integration. *Chi and Creativity* is the authors' way of sharing this magical transformative process and can be used by anyone who wants to add fuel to their creative fires.
