This book investigates the strengths and weaknesses – in terms of transparency and compliance with the democratic principle – of Bretton Woods Institutions, considering the most important innovations from the original framework achieved through the introduction of independent accountability and complaint mechanisms (the Inspection Panel and Independent Evaluation Office), but also due to relevant reforms in the internal governance of the International Monetary Fund and the new financial assistance tools. One of its main focuses is on evaluating the socio-economic impact of conditionality in the countries requiring financial assistance, acknowledging the need to strengthen social protection policies in the adjustment programs. In addition, emphasis is given to the effects of the “constitutionalization” of the Washington Consensus in the European Union, with the establishment of the so-called “Berlin-Brussels-Frankfurt Consensus.”

Der Band dokumentiert die Ergebnisse der dritten IAPL-MPI Post-Doctoral Summer School, die vom 1. bis 4. Juli 2018 in Luxemburg stattfand. Die Summer School bringt herausragende junge Post-Doc-Forscher zusammen, die sich mit dem europäischen, internationalen und vergleichenden Verfahrensrecht sowie anderen relevanten Mechanismen der Streitbeilegung befassen. Ihnen wird die Möglichkeit geboten, aktuelle Forschungsprojekte offen mit jungen Kollegen und erfahrenen Wissenschaftlern zu diskutieren. Der fruchtbare Generationenmix steht im Mittelpunkt des Projekts, das sich auf prozessualer und materieller Ebene v.a. mit nationalem Recht, der Rechtsvergleichung, dem Europa- und Völkerrecht befasst.

Italy is one of the most recent migratory destinations in Europe, having long been one of the continent's most important sources of emigration. Due to its strategic position in the Mediterranean, the Italian peninsula is a crossroads of complex transnational movements and represents a unique and dynamic context for the study of contemporary migration and its representation through the diverse channels of media, literature and film.<br> The product of a two-year interdisciplinary research project into representations of migration to Italy, this volume brings together scholarly contributions from the fields of migration studies, linguistics, media, literature and film studies as well as essays by practitioners and activists. It provides both a multi-faceted snapshot of how diverse representations of immigration capture experiences and affect decision-making dynamics and an in-depth study of how media, literature and cinema contribute to the public perception of migrants within the destination culture.

This is the first systematic comparative study into how consumer ADR systems (usually ombudsmen and médiateurs) work, the differing national architectures within which they operate and how they can be improved. It describes ADR schemes in Belgium, France, Germany, Lithuania, the Netherlands, Poland, Slovenia, Spain, Sweden and the United Kingdom as well as emerging pan-EU dispute resolution schemes. Use of the techniques of mediation, conciliation and adjudication are noted. It also covers EU measures on consumer ADR, and 2011 proposals for legislation on ADR and ODR. Data on volumes, cost and duration of ADR schemes are compared, both between different systems and with courts. The authors' findings underpin EU and national

developments, and outline options for future policy. Findings and proposals are included for the functions, scope, performance, essential requirements, architecture and operation of ADR systems. The relationships between ADR, courts and regulators are discussed, and need for reforms are noted. This is a ground-breaking work that will have a major impact on European legal systems.

The book explores the current role of nationality from the point of view of international law, reassessing the validity of the 'classical', state-centered, approach to nationality in light of the 'new' role the human being is gradually acquiring within the international legal order. In this framework, the collection assesses the impact of international human rights rules on the international discourse on nationality and explores the significance international (including private international) law attaches to the links individuals may establish with states other than that of nationality. The book weighs the significance of the bond of nationality in the context of regional integration systems, and explores the fields of international law in which nationality still plays a pivotal role, such as diplomatic protection and dispute settlement in international investment law. The collection includes contributions from legal scholars of different nationalities and academic backgrounds, and offers an excellent resource for academics, practitioners and students undertaking advanced studies in international law.

Mathematical Logic is a collection of the works of one of the leading figures in 20th-century science. This collection of A.M. Turing's works is intended to include all his mature scientific writing, including a substantial quantity of unpublished material. His work in pure mathematics and mathematical logic extended considerably further; the work of his last years, on morphogenesis in plants, is also of the greatest originality and of permanent importance. This book is divided into three parts. The first part focuses on computability and ordinal logics and covers Turing's work between 1937 and 1938. The second part covers type theory; it provides a general introduction to Turing's work on type theory and covers his published and unpublished works between 1941 and 1948. Finally, the third part focuses on enigmas, mysteries, and loose ends. This concluding section of the book discusses Turing's Treatise on the Enigma, with excerpts from the Enigma Paper. It also delves into Turing's papers on programming and on minimum cost sequential analysis, featuring an excerpt from the unpublished manuscript. This book will be of interest to mathematicians, logicians, and computer scientists.

What road should procedural innovation take? More than 20 experts from practice and academia discuss the future of EU civil procedure, ranging from cross-border enforcement to mutual trust, from E-CODEX to Online Dispute Resolution. They offer blueprints for a reinvigorated judicial cooperation.

Raising a series of questions on resolving mass disputes, and fuelling future debate, this book will provide a challenging and thought-provoking read for law academics, practitioners and policy-makers.

As any traveler knows, some of the best and most honest conversations take place during car rides. So, when a long-time NPR correspondent wanted to learn more about the real China, he started driving a cab--and discovered a country amid seismic political and economic change. China--America's most important competitor--is at a turning point. With economic growth slowing, Chinese people face inequality and uncertainty as their leaders tighten control at home and project power abroad. In this adventurous, original book, NPR correspondent Frank Langfitt describes how he created a free taxi

service--offering rides in exchange for illuminating conversation--to go beyond the headlines and get to know a wide range of colorful, compelling characters representative of the new China. They include folks like "Beer," a slippery salesman who tries to sell Langfitt a used car; Rocky, a farm boy turned Shanghai lawyer; and Chen, who runs an underground Christian church and moves his family to America in search of a better, freer life. Blending unforgettable characters, evocative travel writing, and insightful political analysis, *The Shanghai Free Taxi* is a sharply observed and surprising book that will help readers make sense of the world's other superpower at this extraordinary moment.

Learn the art of dip pen calligraphy! Kestrel shares all the tips she wishes she had known when starting! *Modern Calligraphy* is the perfect book for those who want to dive into the world of gorgeous modern calligraphy lettering. A beautiful book packed with color images, helpful information, and tons and tons of practice pages!

This book provides a comprehensive overview of the fundamental security of Industrial Control Systems (ICSs), including Supervisory Control and Data Acquisition (SCADA) systems and touching on cyber-physical systems in general. Careful attention is given to providing the reader with clear and comprehensive background and reference material for each topic pertinent to ICS security. This book offers answers to such questions as: Which specific operating and security issues may lead to a loss of efficiency and operation? What methods can be used to monitor and protect my system? How can I design my system to reduce threats? This book offers chapters on ICS cyber threats, attacks, metrics, risk, situational awareness, intrusion detection, and security testing, providing an advantageous reference set for current system owners who wish to securely configure and operate their ICSs. This book is appropriate for non-specialists as well. Tutorial information is provided in two initial chapters and in the beginnings of other chapters as needed. The book concludes with advanced topics on ICS governance, responses to attacks on ICS, and future security of the Internet of Things.

The book covers some of the major issues concerning the problematic relationship between respect for democratic principles and the new European Economic Governance. Innovative approaches are highlighted throughout the book: new frameworks and arrangements are proposed on the basis of efficiency analyses, as well as their institutional and legal suitability. Though the perspective adopted is essentially a legal one, the economic and policy background are also given due consideration. The papers presented here offer a balanced mix of empirical (including comparative) and theoretical analysis; several also combine the two approaches, carrying out empirical analyses, then setting the results against theoretical options. Given the relative dearth of literature on democratic principles and the EMU, let alone a comprehensive enquiry, the book marks a valuable new contribution.

The growth in the significance of the private sector ombudsman as a consumer redress mechanism has been matched by a similar growth in the academic literature of the subject. This text draws on the body of existing work to identify those areas where further work would prove valuable.

This fully revised and updated second edition of *The Oxford Handbook of Comparative Law* provides a wide-ranging and diverse critical survey of comparative law at the

beginning of the twenty-first century. It summarizes and evaluates a discipline that is time-honoured but not easily understood in all its dimensions. In the current era of globalization, this discipline is more relevant than ever, both on the academic and on the practical level. The Handbook is divided into three main sections. Section I surveys how comparative law has developed and where it stands today in various parts of the world. This includes not only traditional model jurisdictions, such as France, Germany, and the United States, but also other regions like Eastern Europe, East Asia, and Latin America. Section II then discusses the major approaches to comparative law - its methods, goals, and its relationship with other fields, such as legal history, economics, and linguistics. Finally, section III deals with the status of comparative studies in over a dozen subject matter areas, including the major categories of private, economic, public, and criminal law. The Handbook contains forty-eight chapters written by experts from around the world. The aim of each chapter is to provide an accessible, original, and critical account of the current state of comparative law in its respective area which will help to shape the agenda in the years to come. Each chapter also includes a short bibliography referencing the definitive works in the field.

This book contains the first major comparative study of litigation costs and methods of funding litigation in more than 30 jurisdictions. It was linked with the most comprehensive review of costs ever carried out in England and Wales by Lord Justice Jackson in 2009 and benefited from the assistance of leading practitioners around the globe. The study analyses the principles and rules that relate to paying courts, witnesses and lawyers, and the rules on cost shifting, if any. It also notes the major ways in which litigation can be funded, identifying the global trend on contraction of legal aid, the so far limited spread of contingency fees, and the growing new phenomenon of private third party litigation funding. The study also presents the results of nine case studies of typical claim types, so as to give a first overview comparison of which countries' legal systems are cheaper or more expensive. The book further contains national chapters with in depth analysis contributed by scholars in 18 jurisdictions (Australia, Belgium, Canada, China, Denmark, England & Wales, France, Germany, Japan, the Netherlands, New Zealand, Poland, Portugal, Russia, Spain, Switzerland, Taiwan and USA) and a further chapter on Latin American jurisdictions. 'Dr Hodges, Professor Vogenauer and Dr Tulibacka have conducted an excellent and thorough comparative study of litigation costs and funding across a wide range of jurisdictions ('the Oxford study'). The Oxford study is important, because it provides both context and background for any critical examination of our own costs and funding rules... I commend this book both for its breadth and detail and also for its percipient commentary. This work will make a valuable contribution to the debate which lies ahead about how the costs and funding rules of England and Wales should be reformed in order to promote access to justice.' From the Foreword by Lord Justice Jackson, Royal Courts of Justice, 16th July 2010

A critical interrogation of the public and political discourses which shape the management and lived experience of migration. The collection brings together essays from established and rising academics in the field of migration studies to address the relationship between discourse and migration in Europe, the Americas and the Middle East.

The fast-track guide for the design-conscious traveller Wallpaper\* City Guides present

a tightly edited, discreetly packaged list of the best a location has to offer the design conscious traveller. Here is a precise, informative, insider's checklist of all you need to know about the world's most intoxicating cities. Whether you are staying for 48 hours or five days, visiting for business or a vacation, we've done the hard work for you, from finding the best restaurants, bars and hotels (including which rooms to request) to the most extraordinary stores and sites, and the most enticing architecture and design. Wallpaper\* City Guides enable you to come away from your trip, however brief, with a real taste of the city's landscape and the satisfaction you've seen all that you should. In short, these guides act as a passport to the best the world has to offer.

A pioneering account of the dynastic struggle between the kings of Aragon and the Angevin kings of Naples, which shaped the commercial as well as the political map of the Mediterranean and had a profound effect on the futures of Spain, France, Italy and Sicily. David Abulafia does it full justice, reclaiming from undeserved neglect one of the formative themes in the history of the Middle Ages.

Is mathematics a discovery or an invention? Do numbers truly exist? What sort of reality do formulas describe? The complexity of mathematics - its abstract rules and obscure symbols - can seem very distant from the everyday. There are those things that are real and present, it is supposed, and then there are mathematical concepts: creations of our mind, mysterious tools for those unengaged with the world. Yet, from its most remote history and deepest purpose, mathematics has served not just as a way to understand and order, but also as a foundation for the reality it describes. In this elegant book, mathematician and philosopher Paolo Zellini offers a brief cultural and intellectual history of mathematics, ranging widely from the paradoxes of ancient Greece to the sacred altars of India, from Mesopotamian calculus to our own contemporary obsession with algorithms. Masterful and illuminating, *The Mathematics of the Gods and the Algorithms of Men* transforms our understanding of mathematical thinking, showing that it is inextricably linked with the philosophical and the religious as well as the mundane - and, indeed, with our own very human experience of the universe.

Questa pubblicazione raccoglie una sintesi esaustiva delle pronunce più significative dell'attività svolta nell'ultimo decennio dai CO.RE.COM di tutta Italia e ha l'obiettivo da una parte di documentare le azioni intraprese dai consumatori e dall'altra di stimolare la riflessione sul ruolo dei Co.re.com in un contesto caratterizzato da rapidi mutamenti tecnologici, economici e socio-culturali. I Co.re.com, pertanto, alla luce di una sensibile valorizzazione delle articolazioni territoriali, nonché in virtù della modifiche normative che si sono succedute in questi anni, sono destinati ad assumere un'importanza sempre crescente. Da taluni riconosciuti come "Organismi neutrali atipici", da altri ricondotti nell'alveo di "autorità regionali indipendenti", oggi i Co.re.com, come sostenuto da autorevole dottrina, si inquadrano nella figura del c.d. "già bifronte" ovvero in parte come organi decentrati dell'Autorità, in parte come struttura della Regione. Insomma, si può affermare, senza ombra di dubbio, che i prefati operano come organi statali laddove agiscono per il perseguimento di interessi pubblici generali, ma altresì come organi della Regione in virtù della loro localizzazione, organizzazione e modalità di funzionamento. In tal senso i Co.re.com, nell'ambito del sistema reticolare che caratterizza l'ordinamento delle comunicazioni, rappresentano l'istituzione più prossima al cittadino, assimilabile ad una sorta di "ultimo miglio". Pur non avendo alcun

tipo di giurisdizione in senso tecnico, attraverso il tentativo di conciliazione, fanno da collante nelle controversie tra utenti ed operatori della comunicazione. Questi organismi, perciò, rappresentano, incontrovertibilmente, uno strumento di raccordo virtuoso giacché svolgono, da un lato un'azione di informazione volta a sensibilizzare, in particolare, i gestori sull'esigenza di adottare comportamenti chiari e corretti e dall'altra fornendo agli utenti la possibilità di acquisire una migliore conoscenza delle clausole contrattuali. Attraverso il procedimento di conciliazione, infatti, caratterizzato dalla celerità e a titolo non oneroso in un'ottica quindi di economia ed efficienza della procedura, gli utenti hanno la possibilità di risolvere stragiudizialmente le controversie insorte, con specifico riguardo, all'ambito della telefonia. Certamente, in considerazione dell'importanza del settore della telefonia sarebbe auspicabile un'interpretazione uniforme della normativa e ciò al fine di evitare esiti diversi per casistiche sostanzialmente uguali nella prospettiva della certezza del diritto. Si può, dunque, pacificamente ritenere che il Co.re.com rappresenta l'istituzione più prossima al cittadino, ovvero il local loop del governo delle comunicazioni in grado di svolgere e realizzare concretamente le garanzie in materia di servizi e di diritti fondamentali riconosciuti dall'ordinamento delle comunicazioni. E proprio, in quest'ottica oggi il sistema di risoluzione delle controversie tra operatori ed utenti risulta essere oltre che uno dei più interessanti, senz'altro il più avanzato. La delibera 203/18/CONS che ha determinato l'entrata in funzione della piattaforma telematica di gestione delle controversie denominata "Conciliaweb" si pone esattamente in tale direzione. La prefata novità apre certamente lo scenario ad un avvio di un processo di conciliazione moderno che appare sin d'ora decisivo per la crescita e la competitività del nostro paese.

Naples is one of Europe's most fascinating cities and the ruling dynasty which left its mark more than any other was that of the Bourbons, who arrived in 1734 and were only displaced by the Unification of Italy in 1870. Before that time Naples was the largest of the Italian kingdoms and, with Pompeii and Vesuvius as its main attractions, it drew hundreds of aristocratic travellers and visitors in the 18th century. The city also attracted the armies of revolutionary France and the royal family escaped to Sicily thanks to Admiral Nelson. The Bourbons of Naples was welcomed as a masterpiece at the time of first publication in 1956, and was chosen by Sir Osbert Sitwell as his book of the year. Sir Harold Acton (1904-1994) - famous aesthete and historian - brings 18th-century Naples vividly to life, with unforgettable characters such as Lady Hamilton and Nelson, royal eccentrics and plenty of court intrigue. 'An elaborate comedy of manners played out over 700 pages.' The Times

This book presents the evolution of Italian administrative law in the context of the EU, describing its distinctive features and comparing it with other experiences across Europe. It provides a comprehensive overview of administrative law in Italy, focusing on the main changes occurred over the last few decades. Although the respective chapters generally pursue a legal approach, they also consider the influence of economic, social, cultural and technological factors on the evolution of public administration and administrative law. The book is divided into three parts. The first part addresses general issues (e.g. procedures and organization of public administrations, administrative justice). The second part focuses on more specific topics (e.g. public intervention in the economy, healthcare management, local government). In the third part, the evolution of Italian administrative law is discussed in a comparative perspective.

Courtesy book, specifically intended for children. First appears in Italian in 1558.

The aim of this book is to provide an insight into the landmark rulings of the Court of Justice of

the European Union (CJEU) in European Criminal Law (ECL). As in other areas of EU law, the decisions of the CJEU have been a driving force for development and integration. By analysing the impact of these leading cases on EU and national law, the book provides a diachronic and multifaceted picture of the Court's approach to criminal law.

National civil justice systems are deeply rooted in national legal cultures and traditions. However, in the past few decades they have been increasingly influenced by integration processes at the regional, supra-national and international level. As a by-product of the emergence of economic and political unions and globalisation processes there is pressure to harmonise or even unify the way in which national civil justice systems operate. In an attempt to create a 'genuine area of justice', new unified procedures are being developed, which operate in parallel with national civil procedures, and sometimes even strive to replace them. As a reaction to the forces that endeavour to harmonise and unify procedural laws and practices, an opposing trend is gaining momentum: one that insists on diversity and pluralism of national civil procedures. This book focuses on the evolution of procedural reforms in various jurisdictions and the ongoing transformation of national civil justice systems.

Auch das Verfahrensrecht ist dem Nationalstaat entwachsen und ist mehr und mehr durch Europäisierung und grenzüberschreitende Vereinheitlichung geprägt. Die zunehmende Bedeutung der transnationalen Rechtsbeziehungen in allen Bereichen des Zivil- und Handelsverkehrs macht es unvermeidlich, sich den neuen Herausforderungen des Verfahrensrechts über nationale Grenzen hinweg zu stellen. Traditionelle dogmatische Ansätze und Methoden zum Zivilverfahren, die den wissenschaftlichen Diskurs über Jahrzehnte prägten, sind oftmals nicht mehr in der Lage, die zunehmende Komplexität der Gegenwart abzubilden. Vor diesem Hintergrund können Methoden wie vergleichende und interdisziplinäre Ansätze sowie quantitative und qualitative empirische Analysen der prozessrechtlichen Forschung ihre umfassende Erklärungskraft sichern – auch unter transnationalen Vorzeichen. Das vorliegende Buch präsentiert dazu die Ergebnisse der zweiten IAPL-MPI-Summer School, die im Juli 2016 in Luxemburg stattfand.

The prominence and growing dependency on information communication technologies in nearly every aspect of life has opened the door to threats in cyberspace. Criminal elements inside and outside organizations gain access to information that can cause financial and reputational damage. Criminals also target individuals daily with personal devices like smartphones and home security systems who are often unaware of the dangers and the privacy threats around them. The Handbook of Research on Information and Cyber Security in the Fourth Industrial Revolution is a critical scholarly resource that creates awareness of the severity of cyber information threats on personal, business, governmental, and societal levels. The book explores topics such as social engineering in information security, threats to cloud computing, and cybersecurity resilience during the time of the Fourth Industrial Revolution. As a source that builds on available literature and expertise in the field of information technology and security, this publication proves useful for academicians, educationalists, policy makers, government officials, students, researchers, and business leaders and managers.

This annual edition of Labour Force Statistics provides detailed statistics on labour force, employment and unemployment, broken down by gender, as well as unemployment duration, employment status, employment by sector of activity and part-time employment...

On September 26, 2017, the biggest recruiting scandal in college basketball history sent shock waves through the world of sports. Caught up in a massive FBI and NCAA investigation—and the intense media spotlight—was Rick Pitino, the Louisville Cardinals' Hall of Fame coach. Here, from Pitino himself, comes the real story of the ongoing case and the hard truth about how college hoops has been pushed to the brink of disaster by

greed, bad actors, and shoe company money. Rick Pitino has spent a lifetime in basketball. He is the recruiting and coaching maestro behind Final Four appearances with three different teams, and National Championships at two of them. He worked the early days of the legendary Five-Star camp and scouted players without the influence of agents, runners, or shoe companies. And he has run today's recruiting gauntlet of sports apparel marketing, corrupted assistant coaches, unethical youth coaches, and powerful organizations hellbent against him. Rick Pitino has seen it all, dealt with it all, and now tells it all. Pitino is the story of an epic coaching career and the evolution of NCAA basketball to the multi-billion-dollar enterprise it is today. It is also a master's course on the arts of coaching and recruiting. And in the telling, the one and only Rick Pitino lays all his cards on the table in addressing scandals of his past and the current headline-grabbing investigation that led a packed Board of Directors at Louisville to derail his career.

Cyber security has become a topic of concern over the past decade as private industry, public administration, commerce, and communication have gained a greater online presence. As many individual and organizational activities continue to evolve in the digital sphere, new vulnerabilities arise. *Cyber Security and Threats: Concepts, Methodologies, Tools, and Applications* contains a compendium of the latest academic material on new methodologies and applications in the areas of digital security and threats. Including innovative studies on cloud security, online threat protection, and cryptography, this multi-volume book is an ideal source for IT specialists, administrators, researchers, and students interested in uncovering new ways to thwart cyber breaches and protect sensitive digital information.

A full-scale portrait of the early twentieth-century Supreme Court justice seeks to distinguish his personal life from his achievements as a reformer and jurist, offering additional insight into his role in the development of pro bono legal services, the creations of the Federal Reserve Act and other key legislations, and his contributions to American-Jewish affairs as a practicing Zionist.

This book focuses on the changing role of judges in courts, tribunals, and other forums across a variety of jurisdictions. With contributions by international experts in judicial administration and senior judicial figures, it provides a unique comparative perspective on the role of modern judges in a rapidly evolving environment and the pressures of effective judicial administration. The chapters are sourced from a Collaborative Research Network focused on innovations in judging, and sponsored by the international Law and Society Association. The book provides essential insights and

perspectives for judges, judicial officers, and administrators, allowing them to respond to the challenges of the twenty-first century. It is also a valuable resource for legal practitioners and judicial experts, shedding light on the role of the modern judge and the strategies they employ.

Earlier theses on the history of childhood can now be laid to rest and a fundamental paradigm shift initiated, as there is an overwhelming body of evidence to show that in medieval and early modern times too there were close emotional relations between parents and children. The contributors to this volume demonstrate conclusively on the one hand how intensively parents concerned themselves with their children in the pre-modern era, and on the other which social, political and religious conditions shaped these relationships. These studies in emotional history demonstrate how easy it is for a subjective choice of sources, coupled with faulty interpretations – caused mainly by modern prejudices toward the Middle Ages in particular – to lead to the view that in the past children were regarded as small adults. The contributors demonstrate convincingly that intense feelings – admittedly often different in nature – shaped the relationship between adults and children.
