This memoir is a delightfully humorous account of a suburban homemaker's foray into the Old World in the wake of her husband's corporate transfer to Belgium. As a naive forty something, suffering from wanderlust despite never having taken a flight longer than a twenty minute puddle-hopper between Syracuse and Buffalo, the author was suddenly confronted with the necessity of moving herself and all her family's worldly possessions to a little town in Belgium. She was ready for this. Or so she thought. Given her propensity to attract trouble (think Lucy Ricardo!), the author's great naivete leads her into many comic misadventures ranging from her attempt to smuggle thousands of dollars in pesetas through Spanish customs for a friend, introducing the Mexican ambassador to a roomful of people by the wrong name (a faux pas that haunts her to this day), and finding her car missing in London when she goes on a wild shopping spree. Her husband once said that everytime she walks out the door, he wonders if he'll ever see her again. And with good reason. But there are poignant and heartrending moments, as well, such as a never-to-be-forgotten moment at Luxembourg War Memorial Cemetery, and the gut-wrenching events that unfold at the infamous Berlin Wall. When the author finally returns stateside at the end of her husband's assignment, she was more *savoir-fair* and worldly-wise than when she came. Or was she? Even she is surprised by the answer to that question.

Love And Labor is written with so much love for life, human beings, and the written word, that it never feels laborious. The pages and years fly by--from the Depression and sexual revolution of the 30s, through WWII, to the present. Doris Murphy is, of course, at the heart of this memoir, but she shares her story with Joe Murphy, the love of her life, a legend who helped change the course of labor history. -Jonah Raskin, author of *American Scream: Allen Ginsberg's 'Howl' and Making of the Beat Generation*. An engaging, frank story of an independent young woman's explorations with life and romance culminating in her marrying an equally independent labor leader. There's a rich lode of 20th century cultural history here and a wonderful picture of San Francisco in the 30s, 40s and 50s. What a time to have been young! -Robin Beeman, author of *The Lost Art of Desire* In a crisp, authoritative and compassionate voice, Doris Murphy records California labor history and her private loves as well. Love And Labor deserves a place in history and writing classes in every high school and college in America. -Chester Aaron, author of *Symptoms of Terminal Passion*.

This volume provides the first English translation of all the known correspondence to and from Soren Kierkegaard, including a number of his letters in draft form and papers pertaining to his life and death. These fascinating documents offer new access to the character and lifework of the gifted philosopher, theologian, and psychologist. Kierkegaard speaks often and openly about his desire to correspond, and the resulting desire to write for a greater audience. He consciously recognizes letter-writing as an opportunity to practice composition. Unlike most correspondence, Kierkegaard's letters expressly "do not require a reply"--he insists on this as a principle, while he clearly and earnestly yearns for a response to his efforts. Among his other principles are purposefulness, directness, and the equality of a letter to a visit with a friend (Kierkegaard preferred the former to the latter). Perhaps more than anything else in print, Kierkegaard's Letters and Documents reveal his love affair with the written word.

DAD'S BEST MEMORIES AND RECOLLECTIONS is Chazz Humber's epitaph casting a very long and sentimental shadow across North America and beyond. This 230-page volume is his granite monument, well-polished! It lavishly records 125 of his best memories over a life-span of nearly eighty years. The vignettes are serenaded with more than 400 illustrations. Those discovering this volume likely will find themselves wanting to record, in their own sunset years, their personal memories and recollections. And when they do, they are apt to recall what it was like to live in their fluctuating world dominated by a variety of personalities and cascading events. Mr. Humber vividly describes what it was like, in 1945, to travel in a 1930 Model A Ford from Toronto to Boston. With lively enthusiasm, he reports what it was like to live in post-World War II Boston, to cook a lobster for a former President of the United States or to sell a pair of elevator shoes to one of Hollywood's shortest celebrities or to shine the shoes of a Derby-hatted father of a future President of the United States. It is not a remarkable achievement to reflect, to recall or to have memories that are treasured. But to tell them with literary aplomb, to recall the events that happened nearly seventy-five years ago with utmost clarity is definitely an admirable achievement and should be cherished not only by the kin who follow Mr. Humber but by those who might like to imitate what he has monumentally achieved in *Dad's Best Memories and Recollections*.

From the New York Times bestselling author of *Fatal Vision* comes a shocking true account of murder, family secrets, and final justice now available for the first time as an e-book... One hot summer night in 1988, Bonnie Von Stein's second husband was murdered in their bed, Bonnie herself stabbed, beaten, and left for dead beside him. It looked like a brutal but tragically typical case: Von Stein was newly wealthy, and Bonnie's troubled son Chris, seemed like the obvious suspect. But Chris turned out to have an air-tight alibi and new leads suggested the crime could be much more complex. The trail led to Chris's two strange new friends from college and a real-life enactment of a bizarre *Dungeons and Dragons* fantasy adventure, and it implicated Bonnie's teenage daughter as well. In *Cruel Doubt*, Joe McGinniss probes the dark heart of family life and small-town North Carolina society to uncover a fascinating and terrifying story that is at once a chilling murder mystery, a tense courtroom drama, and a heartbreaking account of a mother forced to doubt her own children.

This book takes a developmental perspective at the use of scoring rubrics to assess student work. Citing developmental characteristics of each age, the author presents examples and adaptations of assessment rubrics on a variety of subjects for teachers from kindergarten through adult/college. After a presentation of foundation information on rubrics, separate chapters are devoted to each grade level from primary through adult. Written so that each chapter can be addressed independently, the book provides additional chapters devoted to assessing technological topics and using rubrics with students with special needs. The final chapters provide practical information to help teachers to create their own rubrics and to convert rubric scores

to letter grades. An updated annotated listing of recommended rubric websites is included.

At the age of nineteen, I left college at New York University after deciding that I did not want to be an electrical engineer and that I would not make the varsity basketball team. That meant two years in the army. It was an exciting test of my ability to function away from home. This was very late 1952. There was a war on in the Far East. My Uncle Sam decided that, being tall and strong, I would make good rifleman. After making me what he had proposed, he sent me to Korea to test my skills. They were sufficient to stay alive during the last few months leading to the truce. It was signed on July 27, 1953. I was sent to division headquarters on a mission that eludes my memory. But I did remember that I wanted to get out of the infantry company. The division newspaper beckoned, and the noncom in charge decided that I wrote well enough to join his staff. Besides, he needed someone with frontline experience. I became a cub reporter and, later, an official US Army correspondent. I began to read voraciously, starting with Ernie Pyle and Hemingway. I found my passion. The GI Bill allowed me to study, then give up journalism in favor of literature and the theater as a playwright and director. Circumstances in 1958 caused me to stop my pursuit of theater and to make a living for a family. I've never regretted that decision. A vacation visit to the Korean War Memorial in the year 2000 in Washington, D.C., awakened my desire to pick up the pen again. It started with minor poetry, one-act plays, short stories, and this novella. My protagonists are often soldiers, past, present, or future. However, I don't write war stories. I only know how war can effect the minds of those who experienced it.

Paul Stearns, one of the CIA's top undercover agents, has just succeeded in smuggling an East German scientist through the Berlin Wall, when suddenly Stearns falls flat on his face—literally. Stearns plunges into a coma that lasts for three days. When the CIA learns that Stearns has Remington's Syndrome, a rare neurological disease that causes its victims to have numerous blackouts, Stearns is forced to resign. Frustrated and angry, the young agent retreats to Colchester Vermont to see if he can put his life back together. It is here that Stearns meets the striking Kathleen O'Brien, the unattached assistant professor who becomes his tennis partner and lover. When a defecting KGB Colonel informs the CIA that Kurt Dietz, one of the best trained agents in the Communist world, has been ordered to assassinate a top level U.S. leader, the CIA needs their former agent's help. Why? Because Stearns is one of only three people in the entire U.S. who has actually seen Dietz face to face. In spite of his recurring blackouts, can Stearns intercept this illusive spy before he completes his assignment?

A collection of essays and insights from the hindsight of a renowned historian: "I was exceedingly fortunate to teach (for forty years) in an elite undergraduate college, where I could mentor intelligent young women who were eager to learn. But Wellesley, still a bastion of Christian privilege a century after its founding, continued to experience (and demurely tolerate) dismayingly episodes of anti-Semitism. How ironic that Wellesley and Israel, each in its own distinctive way, had converged to liberate me from my past as a non-Jewish Jew. Regardless of the subject, modern American history, American Judaism, Israeldeference to the conventional wisdom never had been my style. I always enjoyed the stimulation of writing against the grain: discovering hidden meanings, challenging historical and political pieties, and exposing the self-serving ideology that often lurked beneath self-evident truths. Providing intellectual catnip, it also enabled me to reach readers far beyond the narrow confines of academic journals. My creative work always was done in the solitude of my study, my sanctum within my home. Enclosed within the treasured artifacts, maps, photographs, prints, and books accumulated during decades of

research and travel, I explored the historical past that both inspired and reflected my own intellectual trajectory. Virtually every book I have written, to my genuine surprise, contained within it the seed of its successor. That, of course, is discernible only with hindsight which, after all, is the distinctive attribute of a historian. I invite my family, friends, and interested readers to accompany me to some favorite destinations during my journey."

Shortly after we set up shop, the four of us and our wives convened at Arthur's home on Long Island to celebrate. It was a festive occasion, and we all openly shared our aspirations. To this day, I remember the others stressing over and over their desire to become wealthy. Given that Joanie and I were raising two toddlers and lived nearly hand-to-mouth, the talk was certainly seductive. Still, what I remember most from that dinner was my declaration that the money should be secondary-what mattered more to me was to build a great firm: one that would lead the industry, employ lots of people, endure over many years, and, importantly, command respect. Over the next forty-three years, I never altered my priorities."-from THE REAL DEAL The Sandy Weill story is truly one for the ages. Starting with \$30,000 in borrowed cash in 1960, and relying on uncanny entrepreneurial instincts, Sandy created one of the leading securities firms in the U.S. and became one of the best known businessmen in the world. After selling his company to American Express and becoming its president, he experienced a professional setback. Undaunted, he cannily parlayed it into a second career, starting over with a sleepy consumer loan company called Commercial Credit, which over the next seventeen years he transformed into the leading global bank, Citigroup. During this span, Weill as chairman and CEO delivered an astounding 2,600 percent return to investors-better than legendary CEO Jack Welch or investor Warren Buffett during that same period. Yet

success is never an easy path, and Weill divulges the highs and lows. His ascent to power has been documented by the media over the years, but never before has Weill revealed the brutally honest and unvarnished side of an astonishing life and career. And Weill goes further, sharing his love of philanthropy, a journey that took him "from a mediocre bass drummer in my high-school marching band to the chairmanship of Carnegie Hall." He brings readers into his personal life, introducing them to his wife, Joan, his daily inspiration, and discussing his relationships with competitors and colleagues alike, including proteges like Peter Cohen and Jamie Dimon. Along the way, he shares the most important lessons he learned in business and in life. From a middle-class Brooklyn childhood to corporate legend, philanthropist, financier, and chairman emeritus of Citigroup Inc., *THE REAL DEAL* tells a remarkable story—that of a financial superstar who always loved the game more than the gold.

Drawing on a wide and rich array of sources, this book explores the nature and extent of Dutch trade and commerce in the Río de la Plata during three decades of the least-studied century (1650–1750) of Spain's rule in the Americas. In doing so, it raises important questions about trade in colonial South America and how it was impacted by the Dutch, suggesting that these transactions were carried out within the confines of the law, contradicting common beliefs among scholars that this trading was not regulated. The book contributes to a growing literature on contraband trade, administration, networks, and corruption while challenging narratives of exclusively Spanish influence on the Americas.

Managers increasingly must make decisions based on almost unlimited information. How can they navigate and organize this vast amount of data? *Essentials of Business Research Methods* provides research techniques for people who aren't data analysts. The authors offer a straightforward, hands-on approach to the vital managerial process of gathering and using data to make clear business decisions. They include such critical topics as the increasing role of online research, ethical issues, data mining, customer relationship management, and how to conduct information-gathering activities more effectively in a rapidly changing business environment. This is the only such book that includes a chapter on qualitative data analysis, and the coverage of quantitative data analysis is more extensive and much easier to understand than in other works. The book features a realistic continuing case throughout the text that enables students to see how business research information is used in the real world. It includes applied research examples in all chapters, as well as Ethical Dilemma mini-cases, and interactive Internet applications and exercises.

*Standing Against Dragons* examines the careers of three exceptional lawyers who championed civil liberties and fought for civil rights in the two decades after World War II. John Coe of Pensacola, Florida, Clifford Durr of Montgomery, Alabama, and Benjamin Smith of New Orleans became southern dissenters, resisting both the excessive zeal of the anti-Communist right and southern segregation laws. Coe, Durr, and Smith all appeared with their clients in the much-publicized 1954 investigation of the Southern Conference Educational Fund and defended persons subpoenaed by the House Un-American Activities Committee (HUAC). Coe represented the ardent integrationist who was the last man indicted for contempt by the HUAC, and Smith's offices were raided in 1963 as a result of his civil rights work in Mississippi. Despite personal and political differences, these men remained committed civil libertarians in this era of repression. While formally rejecting Communism -- defending freedom of expression and association in almost every instance -- these advocates, in practice, disavowed individualism in favor of the common good and feared the oppression of unbridled government. Consequently they faced professional scorn, personal ostracism, and official harassment. Sarah Hart Brown's astute analysis reveals the wide range of southern political ideas and defines the positions of southern liberals and radicals in the broader stream of American liberalism during the postwar period.

When it was first published twenty years ago, *The Bedford Guide for College Writers* brought a lively and innovative new approach to the teaching of writing. Since that time, authors X. J. and Dorothy M. Kennedy have won praise for their friendly tone and their view, apparent on every page of the text, that writing is the "usually surprising, often rewarding art of thinking while working with language." More recently, experienced teacher and writer Marcia F. Muth joined the author team, adding more practical advice to help all students — even those underprepared for college work — become successful academic writers. While retaining the highly praised "Kennedy touch," *The Bedford Guide* continues to evolve to meet classroom needs. The new edition does even more to build essential academic writing skills, with expanded coverage of audience analysis, source-based writing, argumentation and reasoning, and more.

Draws from the disciplines of philosophy, history, biology, and animal behavior to argue in favor of the humane use of animals in biomedical research and negotiate the divide between research and concern for animals.

A disturbing trend faces education in the U.S.—not plagiarism but academic forgery (students purchasing and signing their names to work produced by others). This book, by a former professional forger, describes the difference between the two and presents case studies along with an expose of the trade. The author provides a thorough treatment of the topic and reveals the serious implications for the future of academia. Educators should educate themselves about forgery and join the conversation about solving the problem.
