The history of dining in Virginia goes back to 1607. Dairy lunches and tearooms dominated the early twentieth-century dining scene. Local favorite Doumar's--famous for inventing the ice cream cone--became the rage at the 1907 Jamestown Exposition, and palatial seaside resorts like the Cavalier attracted patrons to their luxurious dining rooms in the Roaring Twenties. In the 1930s, Bacalis' Hot Dog Place invented the Norfolk Dog, a tradition that's carried on today. Steinhilber's has catered to family nights out for decades, keeping pace as the local food scene has grown and changed. Join local chef and food writer Patrick Evans-Hylton as he recalls the history of Coastal Virginia's restaurants and the personalities that made them unforgettable. This publication provides the first comprehensive assessment of the relationship between trade standards and development priorities in Africa, with case studies of the use of international standards and capacity for compliance in five countries: Kenya, Mozambique, Nigeria, South Africa and Uganda. It describes the economic context of trade standards in these countries, and examines the mechanisms by which standards and regulations are established and revised at local and international levels. It also considers the probable impact of new standards, regulations and related production/marketing practices in key industries.

This is Switzerland's second largest city (behind Zurich), with 178,900 residents, and is heavily influenced by its French neighbors to the west and south. Here you'll find the quintessence or haute école of everything Switzerland stands for in the new century: beauty, wealth, education, international relations and culture, not to mention romantic scenery at its finest. One aspect of Geneva that is hard to miss is the Genevois' love of food. In fact, Geneva is home to more restaurants per capita (over 1,100 in total) than any other major city in the world -including Manhattan. A visitor will also note that the Genevois serve an unusual preponderance of organ meat dishes, known as "abats." Everything from blood pudding -"boudin noir" -to pickled pigs feet are popular and commonplace here. Geneva has over 30 museums and private galleries, all of which contain prestigious private and public displays of art work, historical documents and cultural highlights. Geneva offers a diverse variety of cultural and sporting events such as classical music concerts, open-air movies on the lakeshore, as well as various trade fairs. Annually Geneva is home to the Inventions and New Techniques Fair, a rousing Automobile Show, an International Book and Press Fair and the High Watchmaking Fair. This is based on our comprehensive Adventure Guide to Switzerland, which is close to 600 pages in the print version. Here, we focus on Geneva and the surrounding area in Switzerland's western portion. Among the many towns described are Lausanne, Montreux, Neufchatel, Fribourg and Gruyeres. Also included is a detailed introduction with full information about what you need to know when visiting Switzerland. Air Force Handbook 10-644 Survival Evasion Resistance Escape (SERE) Operations
27 March 2017 This handbook describes the various environmental conditions affecting human survival, and describes isolated personnel (IP) activities necessary to survive during successful evasion or isolating events leading to successful recovery. It is the fundamental reference document providing guidance for any USAF service member who has the potential to become isolated; deviations require sound judgment and careful consideration. This publication provides considerations to be used in planning and execution for effective mission accomplishment of formal USAF Survival, Evasion, Resistance, and Escape (SERE) training, environmentally specific SERE training, and combat survival continuation training programs. The tactics, techniques, and procedures in this publication are recognized best practices presenting a solid foundation to assist USAF service members to maintain life and return with honor from isolating events.

This book investigates the ways in which these systems can promote public value by encouraging the disclosure and reuse of privately-held data in ways that support collective values such as environmental sustainability. Supported by funding from the National Science Foundation, the authors' research team has been working on one such system, designed to enhance consumers ability to access information about the sustainability of the products that they buy and the supply chains that produce them. Pulled by rapidly developing technology and pushed by budget cuts, politicians and public managers are attempting to find ways to increase the public value of their actions. Policymakers are increasingly acknowledging the potential that lies in publicly disclosing more of the data that they hold, as well as incentivizing individuals and organizations to access, use, and combine it in new ways. Due to technological advances which include smarter phones, better ways to track objects and people as they travel, and more efficient data processing, it is now possible to build systems

which use shared, transparent data in creative ways. The book adds to the current conversation among academics and practitioners about how to promote public value through data disclosure, focusing particularly on the roles that governments, businesses and non-profit actors can play in this process, making it of interest to both scholars and policy-makers.
