The Soweto uprising was a true turning point in South Africa's history. Even to contemporaries, it seemed to mark the beginning of the end of apartheid. This compelling book examines both the underlying causes and the immediate factors that led to this watershed event. It looks at the crucial roles of Black Consciousness ideology and nascent school-based organizations in shaping the character and form of the revolt. What began as a peaceful and coordinated demonstration rapidly turned into a violent protest when police opened fire on students. This short history explains the uprising and its aftermath from the perspective of its main participants, the youth, by drawing on a rich body of oral histories.

Explains the history, manufacturing, distribution, marketing, and environmental impact of paper.

This historical perspective on The Open University, founded in 1969, frames its ethos (to be open to people, places, methods and ideas) within the traditions of correspondence courses, commercial television, adult education, the post-war social democratic settlement and the Cold War. A critical assessment of its engagement with teaching, assessment and support for adult learners offers an understanding as to how it came to dominate the market for part-time studies. It also indicates how, as the funding and status of higher education shifted, it became a loved brand and a model for universities around the world. Drawing on previously

ignored or unavailable records, personal testimony and recently digitised broadcast teaching materials, it recognises the importance of students to the maintenance of the university and places the development of learning and the uses of technology for education over the course of half a century within a wider social and economic perspective.

A Broken Hallelujah traces a young man's path through the Christian Brothers' regime from Juniorate through the

Leaving Certificate year to Teacher Training, and from there to work 'on the mission'. The author describes in intimate detail the experiences and challenges he faces on the way, culminating in the final and most difficult decision of all, whether or not to remain in the fold of the Brothers' Congregation. This unique story recalls a type of education which has long since passed out of use, and has become, for many, a piece of history in itself. In detailing his experiences, the author describes the dilemmas faced by a great number of people, dilemmas which reflect many of the choices and difficulties that have shaped the Ireland of today.

Across the globe, American-style and liberal arts universities are being established. From the first, the American University of Beirut, established in 1866, to the liberal arts institutions being established in Saudi Arabia, Ghana, and elsewhere in the twenty-first century, there is a clear sense of the global desire for the American approach to higher education as a way of counteracting traditional, more narrowly defined university educations. However, these universities operate in a distinctive dynamic that must learn to bridge one culture with another, and leadership of such institutions must by its nature focus on such complexities and tensions. Throughout the chapters of this book, this unique element of these universities will be better understood through the stories and experiences as presented by their presidents, provosts, and other academic leaders.

This book explores the experiences and activities of students across the twentieth century and throughout the United Kingdom and Ireland. The daily experiences of students, their involvement in local communities, national political organisations and widespread cultural changes, are the main focus of this ground-breaking book. It takes students themselves as the subject of inquiry, exploring the fundamental importance of student activities within wider social and political changes and also how some of the key changes across the twentieth century have shaped and changed the make-up, experiences, and lives of students. This book charts the experiences of students throughout a period of unprecedented change as being a student in Britain and Ireland has gone from the endeavour of a small number of elite, mainly wealthy white men, to an important phase of life undertaken by the majority of young people.
