All across America during the great building boom of the early 20th century, one of the most popular sources for home-building materials, fixtures, and trimmings was the Sears, Roebuck catalog for home builders. This fascinating volume, reprinted from a rare surviving edition of that remarkably comprehensive publication, offers a peerless view of how thousands of Americans approached the practicalities and aesthetics of homebuilding in 1910. A huge selection of materials needed to build and finish an early 20th-century home — lumber, siding, roofing, gable ornaments, interior moldings, oak-veneered front doors, art glass windows, chandeliers, stair balusters, bronze door locks, porcelain-enameled bathtubs, furnaces for hard and soft coal, ornate porch rails and Craftsman china closets among them — are depicted in detailed line drawings with the original advertising copy, specifications, and prices. Leafing through these pages, it quickly becomes apparent just how many readers — and buyers — this extraordinary book attracted. Many of the products and designs are still very much a part of the American landscape, easily recognizable in nearly every community in America today. Students and enthusiasts of American home and home-product design will find this unique publication an authentic and reliable sourcebook of early 20th-century Americana. Anyone interested in renovating houses of this era will find it indispensable.

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.
