Love should burn slowly, but with Ezra "Ethic" Okafor it is always fleeting. After an accidental killing affects Alani, the woman he loves, she thinks he's a monster. Separated by tragedy, the pair endure a loss like nothing they have ever felt and their connection is impossible to repair. Ethic is reduced to misery and raising his children alone once again. With Morgan in the throes of a passionate love affair and Bella in need of guidance that he can't provide, Ethic is in turmoil. He's failing as a man and the fingerprint he is leaving on the world is a bloody one. In this second installment of this epic love story, Ashley Antoinette taps into the soul of her readers as she explores the limits of love and forgiveness. Is anything truly unforgivable? Or is Ethic the one man who can love a woman back from the edge of madness. Ashley Antoinette is one of the most prolific and successful writers of her generation. The feminine half of the popular duo (Ashley and JaQuavis) she has co-written over forty novels. She is most widely regarded for her racy, New York Times Best Selling series, The Prada Plan. What's new about this third edition of the long respected and often used Church Administration Handbook? In addition to time and technological-sensitive updates to the basic organizational details, editor Bruce Powers writes: "The needs of people and churches have continued to change, with questions now being raised about the quality of congregational life, nature of leadership, and responsibility for ministry among all believers . . . As we have prepared this edition, we have sought to address five primary needs. 1. Leadership skills and administrative tools that can be adapted for use in a variety of contexts from traditional to contemporary, from rural to urban, and from unicultural to multicultural settings; 2. Spiritual formation that relates to all of life (from birth to death); 3. Mission consciousness (in community, regionally, nationally, and globally); 4. Ministry of all believers (particularly calling out and equipping vocational, bivocational, and lay ministers); and 5. Leadership competence (the ability to inspire, motivate, and equip the saints for the work of ministry)."

Buried in the bowels of one of the several intelligence agencies in the US government is an office of clandestine medical personnel. Their mission is to analyze the health and mental state of international persons of interest and report their findings to America's policymakers. The team is on call 24/7 to comment on and analyze any written observations, pictures or videos of such persons of interest that may come into the hands of the U.S. government. The goal is to provide timely information to policymakers and negotiators so that the United States of America may achieve maximum success in dealing with the people concerned. Usually this is done in the safe confines of the Agency walls, but sometimes the analysts are forced to place themselves in harms way. Through it all and despite the circumstances, their Code of Honor is to Do No Harm.

The life force, also known as "spirit," is the essence of being and the conscious and most important form of energy. Living energy is personal and within our conscious control, and by learning about it, we can use it to transform our life into vibrant and meaningful expressions of who we really are. Consciousness is purely energetic and therefore difficult to quantify in mechanistic terms. It is the characteristic of living energy and is the foundation of awareness. Consciousness is the thread running through all life. Living Energy is an introduction to the process of mystic spirituality. The reader is encouraged to attain a deep and meaningful connection to the divine with expanded awareness. The principles given in this book are equally relevant to the novice and the advanced practitioner. Robert explains how we may reveal our hidden potential by shifting our perception away from what is customary and comfortable to open the doors to greater spiritual awareness.

Is it possible to be a young child and love whole, plant-based foods? It sure is, and Stan of Stan the Plant-eater is a shining example. Stan the Plant-eater is a fun and entertaining book that is simple and to-the-point for young children. Through the use of rhythmic poetry, children are encouraged to eat whole, plant-based foods and be friends with animals. Stan is a young boy who is a compassionate, kind and loving role-model. He is very excited about healthy food and eating lots of it. But, there are some things that he just won't eat. Young children, as well as the adult reading with them, are provided with ideas for meals and for ways to be

kind to animals. Stan the Plant-eater presents the message of health and non-violence in a style that captures the hearts and laughter of children.

A cyanide capsule and a bullet to the head. This is how Adolf Hitler is about to kill himself. The date is the 30th of April, the year is 1945. Hitler and his wife of less than two days, Eva Braun, are together in the Führerbunker, an underground complex near the Reich Chancellery in Berlin. Berlin itself is not yet under siege, but it is apparent to all that it soon will be. For the Allies have defeated the Wehrmacht in the Belgian Ardennes and have already crossed the Rhine into Germany. While at the same time, the Red Army are advancing westwards towards the German capital, unstoppable since their decisive victory at Stalingrad. As a result, SS generals are now refusing to obey Hitler's orders. Stuck down in his bunker and feeling powerless, Hitler has begun to suffer a mental breakdown. The war is lost and he knows it now. Germany surrendered, unconditionally, a week after Hitler's death, on the 7th of May, 1945. The following day was declared Victory in Europe Day. The Second World War on the European continent was formally confirmed over. The war would continue in Asia for another three months, eventually ending on the 15th of August, 1945 - just over a week after the dropping of the Little Boy and Fat Man atomic bombs on the Japanese cities of Hiroshima and Nagasaki. Germany was in utter ruins and occupied by the armies of the Soviet Union, France, America, and Britain and her Commonwealth. Meanwhile the world had witnessed the utterly destructive power of atomic weapons. This was how the Second World War ended; it was also how the Cold War began. The Cold War would last nearly half a century, with flashpoints occurring in locations all across the globe; from Afghanistan to Vietnam, Korea to Cuba. The real Cold War battlefield, though, was in Germany. It was here where the militaries of the Soviet Union and the Warsaw Pact countries faced off against the militaries of America and her European NATO allies. It was here where the bulk of the nuclear missiles were located, where the troops were based. Germany - then Germanies - was the true frontier of the Cold War. Following the collapse of the Berlin Wall in 1989, and the dissolution of the Soviet Union shortly after in 1991, the militaries that had based themselves in Germany for the past 50 years started to slowly return to their respective home countries. The military bases, and all the infrastructure that went along with sustaining them, were stripped bare and left behind. The purpose of this book is to document these Cold War sites as they are today, in 2016. They will not be around for much longer; most face imminent demolition, and the ones that don't are decaying and succumbing to nature. The hope is that by documenting how these bases currently are, as well as providing a short history on each of the sites, an audience unable to visit them themselves will learn something new about the Cold War. It was a military stand-off on a scale of which the world has never seen before. We have history books that communicate that scale; that communicate the dangers faced; the close calls and near misses; the fallibility of all those involved. Perhaps this book, and the pictures it contains, can help to communicate some of these things too, but in a different way.

When the author's mother died he discovered over 200 letters in a shoe box that his father had written to her during their separation during World War II. Captain Lashley was stationed first at a hospital in England as a supply officer and then as the commander of a prisoner of war camp in France. During those months his letters tell of the events of his life. Some are boring and seem to be of little consequence, others are filled with emotional turmoil. Rene Lashley, his wife, has his fourth child while he is away, moves in with her mother and sister and raises her other three children. Kirk, the second son, is puzzled by what is happening, but continues doing those things a normal child does. The book is an effort to show the common, everyday concerns of all the family members in what is an unprecedented time in the life of the family and the world. The story is told through the voices of the soldier, the mom, and the child.

This book will help you answer questions like: What is the impact of our company or organization? What common ground do we share with our customers? Is our company more concerned about enhancing its own value rather than enhancing the value of the people we serve? How can we actually show people what we can do for them, rather than just rely on our advertising and marketing to tell them? What is standing in the way of people responding to us? How is using our product or service better than using a competitor's? What things do we need to be doing right now so we can keep providing the same quality in the future? A great read with discussion questions at the end of each chapter. You can use it for yourself, a team building exercise, or an executive retreat. The book is a great discussion starter for any business!

She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first "immortal" human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb's effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta's family did not learn of her "immortality" until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta's daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn't her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

Two weeks, that's all I had. Sent to be a delegate the votes could wait, but Atlanta wouldn't. I became part prophet, part tourist with a splash of barbeque and Hollywood to boot. Southern hospitality ruled strong, yet tears rolled down my cheeks. I crooned in the life of luxury, but this

led to a paradox. Browsing the streets were a cast of humanity - the Georgia Peach, an officer of the law, and a soccer fanatic. They came to where dreams come true. And they all had one thing in common, they talked to me. It didn't stop with them; an owner's daughter speaks, Naughty girl met denial, Duckman swallowed, and Abe Lincoln said let's make a deal. All in a days work. Sherman started his famous March to the Sea in Atlanta. Here, in this travel memoir, Mr. Y. makes his own March to Atlanta. It's where moral conflict broods and serendipity percolates from irrevocable moments. In the here and now Ghandi stands with Martin Luther King. The past becomes the present and the present fades to the past.
