The Galaxy A12 was unveiled by Samsung on November 24th 2020. Unsurprisingly, given its designation, the Galaxy A12 is another wonderful and beautiful budget smartphone which belongs to the 2021 Galaxy A lineup gadget. The Galaxy A12 has a good unibody design, this means that it doesn't have a metal frame like many other Galaxy phones on the market, separating the front and back panels. Instead, the case is designed with just a single molded piece that belts around all four edges until it gets to the display. The phone carries some physical buttons on the right side of the edge, and the back panel is also built to accommodate a square-shaped camera module alongside with an LED flash. The Samsung Galaxy A12 is designed to use an Infinity-V display with a V-shaped notch as well. This smartphone measures at 164 x 75.8 x 8.9 mm, it also weighs 205 grams, and its going to be in circulation in four beautiful color options: black, blue, red, and white. The Galaxy A12 comes with a 6.5-inch HD+ TFT display driven by an unspecified octa-core chipset with two unique CPU assembled together, operating at frequencies of 1.8GHz and 2.3GHz. The application processor is paired with the following 3GB / 4GB / 6GB of RAM as well as 32GB / 64GB / 128GB of

internal, expandable storage. This phone is highly equipped with a superb side-mounted fingerprint scanner, and it also boasts a generous 5,000mAh battery with a support of 15W fast charging. It has a 3.5mm audio port at the base of the phone.

Wanted: Dating coach to help hot nerd win back the woman of his dreams... Picture this - I'm ready to win back the love of my life, and I'm going big this time. We're talking boom box, sing her name in the rain, let the whole damn neighborhood know I'm good and ready this time around. After all, if you're going to grand gesture the ever-loving hell out of a second chance, you need to pull out all the stops. There's only one little problem. My college girlfriend isn't the one who shows up when I play my "I'll do anything to win you back" tune. The woman who flings open the second-floor window tells me my ex doesn't live here anymore. But she'll help me win her back. Anything for romance, anything for a guy so willing to go big for love. And that's what I want at first. Until I get to know my new "romance coach" and discover she's funny, clever, and keeps me on my toes. And boy, do I ever need that. Now I don't want to win anyone else's heart. I want the woman who's been helping me all along. Trouble is - she thinks I'm in love with someone else, and when we take off on a road trip, everything I think I know about women is about to be unzipped and turned inside out.

Unzipped is a standalone spinoff in the Lucky in Love series of standalones

Samsung Galaxy S20 & S20 Plus 2020-2021 User's Guide to Master Your Samsung Galaxy. 40 Best Tips and Tricks for your Android Phone Included The company decided to reboot its flagship lineup, stepping from the Galaxy S10 directly to the Galaxy S20. By naming the new model S20, Samsung first of all broke the associative link of its products with the lineup of its main competitor - Apple iPhone. The company was constantly in the role of "catching up", releasing its flagship with a similar index with a delay of half a year. Let me remind you that the iPhone 11 was introduced back in September 2019 and the Galaxy S11 would again feel a bit late. In addition, in the new line, for the first time since the announcement of the Galaxy S6 Edge in 2015, Samsung has changed a key design element of its flagships, almost completely eliminating the curved display edges. Samsung Galaxy S20 became the first smartphone in the S-line, which lost the 3.5 mm jack, but received support for eSIM (built-in SIM card). Also, for the first time in many years, the company changed the matrix of its cameras to a new sensor from Sony - the IMX555 model. And, of course, this is the first time a new display with a refresh rate of 120 Hz is used. I disagree with those who don't see much change in the Galaxy S20 over previous models. These differences exist and they are quite serious. Rather, the question is different - isn't the new model a "step forward and two steps back"? There is a lot of criticism on the web about new products, especially
