and federalism. The frontier has offered abundance to those who would/could take advantage of its opportunities, stimulated technological innovation, and been the source of continuous change in social structure and economic organization; migration has been responsible for relocating cultures from the Old world to the New: various sections of geographic territories have adjusted to the overall American culture without losing their individual distinctiveness; and federalism has shaped the United States' political and social organization., The Metropolitan Frontier and American Politics was begun in the late 1950s under the auspices of the University of Illinois Institute of Government and Public Affairs as a study of the eight "lesser" metropolitan areas in Illinois. What started out as a design for "community maps" of each area, with the intent to outline their particular political systems, led to a major study of metropolitan cities of the prairie-the "heartland" area between the Great Lakes and the Continental Divide-with an examination of the processes that have shaped American politics. The distinctive features of the geographic areas that Elazar discovered can best be understood as reflections of the differences in cultural backgrounds of their respective settlers. Proper understanding of these communities therefore requires an examination of their place in the federal system, the impact of frontier and section upon them, and a study of the cultures that inform

them as civil communities. The volume is consequently divided into three parts: "Cities, Frontiers, and Sections," "Streams of Migration and Political Culture," and "Cities, States, and Nation," each of which explores Elazar's concerns in discovering the interrelationship between the cities of the frontier and American politics., A prequel to *The Closing of the Metropolitan Frontier*, *The Metropolitan Frontier and American Politics* will be of great interest to students of politics, American history and ethnography.

Are there potentials in central city revitalization?

What role will the federal government play in determining future retail locational choices?

Shopping center development has never been more popular-or more hazardous than it is today. Retail distribution in the United States has greater efficiency than anywhere else in the world, a tribute to the adaptability and rationalization of systems which have characterized the field. The pressures of the future, however, require greater exertion if they are to be adequately met. The industry drive to the new "middle markets" may change the face of small city America-or it may lead to a blind alley. As central cities, aided by EDA (Economic Development Administration) and UDAG (Urban Development Action Grant), gird up for revitalization in the face of reduced real buying power, these issues take on increased vigor. A whole new legal fabric is evolving

in the development of major commercial facilities. Does it mark the path of the future-or is it an ineffectual last gasp effort to reshape the basic overwhelming trend lines of American life? How do we get a grasp on these parameters? Whether city planner, economic or marketing consultant, investor, or developer-much of our future depends on the answers. The authorities brought together for these specially sponsored papers are the best in the business-and provide key insights into this dynamic field. Demographics and consumer response that challenge marketing and planning professionals are also included.
