After Jolly Robin had gulped down the fat angleworm with which his father had coaxed him to leave the nest, he clung desperately to the limb. With no food in sight he had plenty of time to look about him and to be alarmed. The day was not gone before he had a great fright. He tumbled out of the apple tree and fell squawking and fluttering upon the ground. Luckily, his mother happened to be at home. She went to Jolly at once and told him not to be afraid. "Nothing will hurt you," she said, "if 7 you'll only keep still. But if you squall like that, the cat will find you." It may seem strange, but his mother's words frightened Jolly all the more. They

scared him so thoroughly that he stopped making a noise, anyhow. And that was how he learned never to talk when he was on the ground near a house where a cat might live. "Now," said Jolly's mother, as soon as he was still, "I'll teach you a new game. Just watch me!" And spreading her wings, she flapped them, and sprang into the air. Soon Jolly was trying to imitate her. And it was not long before he found himself gliding a short distance, skimming along just off the ground. But in spite of all his efforts, he couldn't help falling again. Though his mother tried to show him how to fly into a tree-top, Jolly Robin seemed unable to learn the trick. At last Mr. Robin said to his wife: "I'll teach him the rest. You've made a good beginning. But he must learn more at once. There's no telling when the cat may come into the orchard to hunt for field-mice. And you know what would happen then.

This is the original, official international diet bestseller used by celebrities such as Adele, heavyweight champion David Haye, and Pippa Middleton. The science-based program will help you lose seven pounds in seven days while experiencing lasting energy and enjoying the foods you love including chocolate, red wine, strawberries, and more. Over the past few years, fasting has become a popular diet option. Studies show that fasting—whether through moderate calorie restriction every day or the more severe but less frequent intermittent fasting—can help people lose about thirteen to fourteen pounds in six months and reduce their risk of developing disease. When we fast, our body's energy stores activate what is known as sirtuins, or the "skinny gene," and many positive changes ensue. Fat storage is switched off, and our body stops its normal growth processes and goes into "survival" mode. Fat burning is stimulated and the genes involved in the repair and rejuvenation of our cells are turned on—which all results to weight loss and improved resistance to disease. But if not done correctly, fasting can lead to hunger, irritability, fatigue, and loss of muscle. Enter Sirtfoods: a newly discovered group of foods that is revolutionizing healthy eating. Ranging from chocolate and red wine to garlic and walnuts, sirtfoods are particularly rich in special nutrients that help us activate the same skinny genes in our bodies that fasting triggers. Nutritionists Aidan Goggins and Glen Matten have created The Sirtfood Diet to help you effectively lose weight and improve your resistance to disease, while still giving you incredible energy and glowing health.

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.
