Essential Oils: Contact Allergy and Chemical Composition provides a full review of contact allergy to essential oils along with detailed analyses of the chemical composition of essential oils known to cause contact allergy. In addition to literature data, this book presents the results of nearly 6,400 previously unpublished sample analyses, by far the largest set of essential oils analyses ever reported in a single source of scientific literature. Covering 91 essential oils and two absolutes, the book presents an alphabetical list of all 4,350 ingredients that have been identified in them, a list of chemicals known to cause contact allergy and allergic contact dermatitis, and tabular indications of the ingredients that can be found in each essential oil. The book discusses contact allergy and allergic contact dermatitis for each of the oils and absolutes, sometimes able to provide only one or two reports but drawing upon considerable amounts of literature in other cases, such as with tea tree oil, ylang-ylang oil, lavender oil, rose oil, turpentine oil, jasmine absolute, and sandalwood oil. While limited information on the main components and their concentrations would be enough for most dermatologists, this book gives extensive coverage not only to improve levels of medical knowledge and quality of patient care, but also for the benefit of professionals beyond clinical study and practice, such as chemists in the perfume and cosmetics industries, perfumers, academic scientists working with essential oils and fragrances, aromatherapists, legislators, and those involved in the production, sale, and acquisition of essential oils.

science principles can be applied in homes, schools, stores, restaurants, workplaces, healthcare facilities, and the other spaces people inhabit. This guide to person-centered place design shows architects, landscape architects, interior designers, and other interested individuals how to develop spaces that enrich human experience using concepts derived from rigorous qualitative and quantitative research. In *Place Advantage: Applied Psychology for Interior Architecture*, applied environmental psychologist Sally Augustin offers design practitioners accessible environmental psychological insights into how elements of the physical environment influence human attitudes and behaviors. She introduces the general principles of place science and shows how factors such as colors, scents, textures, and the spatial composition of a room, as well as personality and cultural identity, impact the experience of a place. These principles are applied to multiple building types, including residences, workplaces, healthcare facilities, schools, and retail spaces. Building a bridge between research and design practice, *Place Advantage* gives people designing and using spaces the evidence-based information and psychological insight to create environments that encourage people to work effectively, learn better, get healthy, and enjoy life.

God's will be done. After eleven years as a priest living by these words, Father Antonio Molinari never imagined who would teach his strongest lesson of faith? a vampire. As a member of a secret order within the Vatican, he investigates and debunks supernatural events. They claim to have captured a vampire, and beg his expertise in helping them study the fiend. The priests, mistaking his compassion for diabolism, panic, and his efforts to protect an innocent child prove fatal. He awakes caught between light and darkness. In 1948 I was posted, as a Political Officer, to a remote part of south-west Arabia on the edge of the great desert called the Empty Quarter. In valleys made fertile by seasonal flood-waters lay the remains of an ancient civilization. I found inscriptions and the ruin sites of towns, palaces and temples. Almost buried under the sand dunes were the tumbled walls of a great city. From here, two thousand years before, huge camel caravans had trudged their way along 1600 miles of burning sand and rocks to Petra and Gaza, burdened with a most precious cargo - frankincense, myrrh and other perfume materials for the courts, temples and perfume shops of Rome. My book Frankincense and Myrrh delved into the details of this romantic trade and led to a broader interest in the perfumes of ancient times. Then, researching on behalf of a perfume house into the Arab contribution to perfumery, I came across the collection of perfume recipes assembled by the Arab philosopher-scientist Yaqub al-Kindi, which have never been translated into English (some, which I have translated myself, are now included in an appendix to this book). I realized that in that work I had found key evidence to demonstrate how the medieval Arab perfume makers had been the bridge in perfume history between ancient and modern times. Perfumery could now be seen

'Gaelic calls spin a web through the mist in arcs of soft sound. Fear unsteadies the unseen flocks on the scrub heather hillside as men and dogs weave a trap around them in the darkling night. Once the flocks are penned, then the lanterns are turned towards the south. The watchers wait in silence.' It is 1793... As Europe watches the French Revolution's bloody progress, uneasy Scottish landowners struggle to secure their wealth and power. And, in Dalriada – the ancient Kingdom of Scotland – fractured truths, torn loyalties and bloody atrocities are rife. Can anyone ride the maelstrom of these dangerous times? Only, it seems, Malcolm Craig Lowrie – the legendary Wolf of Dalriada. In remote Argyll, people cry out to the young laird for protection against the evil of the Clearances. And there is also a beautiful Frenchwoman – staked as a child on the turn of a card – now living in thrall to her debauched captor, Sir William Robinson. But can the Wolf of Dalriada safeguard his people? Can the Wolf defeat enemies who, like the spirit of Argyll's Corryvreckan Whirlpool, threaten to engulf them all? Written with a blend of mysticism and intrigue, the psychological realism of the characters is exhibited in their reaction to tremendous cultural change. The Wolf of Dalriada is a truly fascinating historical novel that will be enjoyed by fans of Philippa Gregory and Hilary Mantel. 'Just stunning writing, historical turmoil and romance at its very best.' – Rhona Whiteford, author and independent publisher, Wild Dog Books Ltd 'A fascinating blend of romance and intrigue set in the highlands of Scotland.

The Odd Society: Book Two An excerpt from Protected by Means of Magic: Return of a Menace Sister Amelia was nearly her composed self, though she looked far from happy. "Father Hall sent me with a most urgent message. For you too, Miss Jean, and I would think Miss Victoria would want to know as well. It seems someone has been asking after you at your boarding house, Mr. McDuff." Everything in McDuff's body seemed to stop at once, and a clammy chill overtook him. Jean spoke before he could manage to draw his next breath. "How did he hear of this? Did he say who, or what the person looked like?" "Father Hall was strangely shy about that," Sister Amelia said. "He said he'd much prefer to explain it himself, but if you asked I should go ahead. He left word there with a Mrs. Richards?" McDuff nodded, and his neck creaked with tension. "She was my landlady there, yes. Father Hall didn't mention leaving word of any kind except that I wouldn't be returning." "That's what he said, exactly so. And that he should have told you both, but he'd hoped and prayed it would come to nothing. But he did leave word in
