

## To Have A Dog

I Don't Have a Dog is all about... having a dog! In this sweet and funny story, a young girl insists she doesn't have a dog, but instead an alarm clock, a vacuum cleaner, a home security system, and even a homework excuse. This fun and creative story explores all the reasons why dogs are known as our best friends.

"A thoughtful book" about how to ensure that the animals we love benefit from the relationship as much as we do (Kirkus Reviews). We feel love for our companions, and happiness that we're providing them with a safe, healthy life. But sometimes we also feel guilt. When we see our cats gazing wistfully out the window, or watch a goldfish swim lazy circles in a bowl, we can't help but wonder: Are we doing the right thing, keeping these independent beings locked up, subject to our control? Is keeping pets actually good for the pets themselves? That's the question that animates Jessica Pierce's powerful *Run, Spot, Run*. A bioethicist and a lover of pets herself (including, over the years, dogs, cats, fish, rats, hermit crabs, and more), Pierce explores the ambiguous ethics at the heart of this relationship, and through a mix of personal stories, philosophical reflections, and scientifically informed analyses of animal behavior and natural history, she puts pet-keeping to the test. Is it ethical to keep pets at all? Are some species more suited to the relationship than others? Are there species one should never attempt to own? And are there ways that we can improve our pets' lives, so that we can be confident that we are giving them as much as they give us? "With gentle humor, clear compelling language, and always in search of the physically and emotionally healthiest lives possible for our animal companions, *Run, Spot, Run* moved me all the more because it's written from the inside looking out. Pierce herself lives with three pets and understands the deep urge so many of us feel to connect across species lines."—Barbara King, author of *How Animals Grieve*

"Dog lovers and neuroscientists should both read this important book." --Dr. Temple Grandin What is it like to be a dog? A bat? Or a dolphin? To find out, neuroscientist and bestselling author Gregory Berns and his team did something nobody had ever attempted: they trained dogs to go into an MRI scanner--completely awake--so they could figure out what they think and feel. And dogs were just the beginning. In *What It's Like to Be a Dog*, Berns takes us into the minds of wild animals: sea lions who can

learn to dance, dolphins who can see with sound, and even the now extinct Tasmanian tiger. Berns's latest scientific breakthroughs prove definitively that animals have feelings very much like we do--a revelation that forces us to reconsider how we think about and treat animals. Written with insight, empathy, and humor, *What It's Like to Be a Dog* is the new manifesto for animal liberation of the twenty-first century.

Provides behavior profiles for all dog breeds recognized by the American Kennel Club, offers advice on selecting a dog, and discusses how to prepare for the puppy's homecoming once the selection has been made

Australian Shepherd Training - Dog Training for your Australian Shepherd puppy The training of dogs is often... .. confused with classical dog training drills ... only considered necessary for demanding dogs ... mocked by other dog owners ... replaced by anti-authoritarian methods ... considered too difficult to achieve without experience. What constitutes dog training and what is it good for? And how can you and your Australian Shepherd profit from it without having any experience? The most important thing is to understand how a dog sees his world, what is "normal" for him and how you can use this to your advantage. In addition, the characteristics of each breed are significant when you get beyond the basic training phase. Your Australian Shepherd will show characteristics which are different to those of a Husky, for example, and this is predominantly what you need to consider during training. This book is vol. 1 of the Australian Shepherd training books. Vol. 2 for your grown up Australian Shepherd is also available with the title "Australian Shepherd Training Vol. 2: Dog Training for your grown-up Australian Shepherd" Author Claudia Kaiser says about her book: "It was my desire to let other dog owners profit from the knowledge I have gained over many years, and after making many mistakes. My aim is to help every beginner, not only to understand his dog better, but also to know exactly how to get the best results, step-by-step, so that you can achieve a close, positive and trusting human-dog relationship." From the #1 bestselling author of *Inside of a Dog*—"an incredible journey into the olfactory world of man's best friend" (*O, The Oprah Magazine*), Alexandra Horowitz's follow-up to her *New York Times* bestseller explains how dogs experience the world through their most spectacular organ—the nose. In her "fascinating book...Horowitz combines the expertise of a scientist with an easy, lively writing style" (*The New York Times Book Review*) as she imagines what it is like to be a dog. Guided by her own dogs, Finnegan and Upton, Horowitz sets off on a quest through the cutting-edge science behind the olfactory abilities of the dog. In addition to speaking to cognitive researchers and smell experts, Horowitz visits detection-dog trainers and training centers; she meets researchers working with dogs to detect cancerous cells and anticipate epileptic seizure or diabetic shock; and she even attempts to smell-train her own nose. As we come to understand how rich, complex, and exciting the world around us is to the canine nose, Horowitz changes our perspective on dogs forever. Readers will finish this book feeling that they have broken free of their human constraints and understanding smell as never before; that they have, for however fleetingly, been a dog. And, as *The Boston Globe* says about *Being a Dog*, "becoming more doglike, not surprisingly, can make anyone's life a little more vivid."

As dogs take their place as coddled family members and their numbers balloon to over 77 million in the United States alone, it's no surprise that canine culture is undergoing a massive transformation. Now subject to many of the same questions of rights and ethics as people, the politics of dogs are more tumultuous and public than ever—with fierce moral battles raging over kill shelters, puppy mills, and breed standards. Incorporating interviews and research from scientists, activists, breeders, and trainers, *What's a Dog For?* investigates how dogs have reached this exalted status, and why they hold such fascination for us humans. Zak George is a new type of dog trainer. A dynamic YouTube star and Animal

Planet personality with a fresh approach, Zak helps you to tailor train to your dog's unique traits and energy level--leading to quicker results and a much happier pet. Packed with everything you need to know to raise and care for your dog, this book will help you communicate and bond with one another in a way that makes training easier, more rewarding, and--most of all--fun!

"What would happen to dogs if humans simply disappeared? Would dogs be able to survive on their own without the help of humans? Many people assume that dogs are so dependent on people that they could not and would not survive in a world without us. But is this true? And why does it matter to contemplate such a scenario? In this book, the authors argue that dogs would, as a species, survive without us and that imagining a world for dogs without humans allows us to explore a number of fascinating questions about the past, present, and future of dogs. The book opens by presenting the current state of dogs, including the surprising fact that of the c. 500 million dogs in the world only 20% are pets while the rest are street dogs, feral dogs, or strays, suggesting diversity in the ways which dogs exploit human habitats and by extension how they would fare without us. From there, the authors explore what is known about dog origins and their co-evolution with humans. The heart of the book draws on evolutionary biology to imagine what dogs might become, biologically, absent humans. For example, if dogs were no longer subjected to artificial selection pressures what would their evolutionary path look like? Would dogs become like their wolf ancestors? Would dogs maintain the evolved socio-cognitive skills that facilitate communication with humans? How would they interact with other animals? The authors conclude the book by asking whether dogs would be better or worse without humans, as imagining a world in which dogs are "wild" raises questions about pet keeping practices and about the costs of captivity for dogs. Ultimately, as the authors say, in thinking about who dogs might become without us we gain fresh insight into who dogs are on their own terms are and how our relationships with them can best benefit us both"--

In a lyrical love letter to guide dogs everywhere, a blind poet shares his delightful story of how a guide dog changed his life and helped him discover a newfound appreciation for travel and independence. Stephen Kuusisto was born legally blind—but he was also raised in the 1950s and taught to deny his blindness in order to "pass" as sighted. Stephen attended public school, rode a bike, and read books pressed right up against his nose. As an adult, he coped with his limited vision by becoming a professor in a small college town, memorizing routes for all of the places he needed to be. Then, at the age of thirty-eight, he was laid off. With no other job opportunities in his vicinity, he would have to travel to find work. This is how he found himself at Guiding Eyes, paired with a Labrador named Corky. In this vivid and lyrical memoir, Stephen Kuusisto recounts how an incredible partnership with a guide dog changed his life and the heart-stopping, wondrous adventure that began for him in midlife. Profound and deeply moving, this is a spiritual journey, the story of discovering that life with a guide dog is both a method and a state of mind.

A pioneering canine behaviorist draws on cutting-edge research to show that a single, simple trait—the capacity to love—is what makes dogs such perfect companions for humans, and explains how we can better reciprocate their affection. "Lively and fascinating . . . The reader comes away cheered, better informed, and with a new and deeper appreciation for our amazing canine companions and their enormous capacity for love." —Cat Warren, New York Times best-selling author of *What the Dog Knows*

Does your dog love you? Every dog lover knows the feeling. The nuzzle of a dog's nose, the warmth of them lying at our feet, even their whining when they want to get up on the bed. It really seems like our dogs love us, too. But for years, scientists have resisted that conclusion, warning against anthropomorphizing our pets. Enter Clive Wynne, a pioneering canine behaviorist whose research is helping to usher in a new era: one in which love, not intelligence or submissiveness, is at the heart of the human-canine relationship. Drawing on cutting-edge studies from his lab and others around the world, Wynne shows that affection is the very essence of dogs, from their faces and tails to their brains, hormones, even DNA. This scientific revolution is revealing more about dogs' unique origins, behavior, needs, and hidden depths than we ever imagined possible. A humane, illuminating book, *Dog Is Love* is essential reading for anyone who has ever loved a dog—and experienced the wonder of being loved back.

What age is the right age to have your first pet? Everything a youngster needs to know about owning and caring for a new puppy is explained in this book including easy-to-understand instructions about daily care, cleaning, feeding and maintaining for one of most popular pets in North America.

As an unabashed dog lover, Alexandra Horowitz is naturally curious about what her dog thinks and what she knows. As a cognitive scientist she is intent on understanding the minds of animals who cannot say what they know or feel. This is a fresh look at the world of dogs -- from the dog's point of view. The book introduces the reader to the science of the dog -- their perceptual and cognitive Abilities -- and uses that introduction

to draw a picture of what it might be like to be a dog. It answers questions no other dog book can -- such as: What is a dog's sense of time? Does she miss me? Want friends? Know when she's been bad? Horowitz's journey, and the insights she uncovered from studying her own dog, Pumpnickel, allowed her to understand her dog better, and appreciate her more through that understanding. The reader will be able to do the same with their own dog. This is not another dog training book. Instead, *Inside of a Dog* will allow dog owners to look at their pets' behaviour in a different, and revealing light, enabling them to understand their dogs and enjoy their relationship even more.

*Training the Best Dog Ever*, originally published in hardcover as *The Love That Dog Training Program*, is a book based on love and kindness. It features a program of positive reinforcement and no-fail techniques that author Dawn Sylvia-Stasiewicz used to train the White House dog, Bo Obama, and each of Senator Ted Kennedy's dogs, among countless others. *Training the Best Dog Ever* relies on trust and treats, not choke collars; on bonding, not leash-yanking or reprimanding. The five-week training program takes only 10 to 20 minutes of practice a day and works both for puppies and for adult dogs that need to be trained out of bad habits. Illustrated with step-by-step photographs, the book covers hand-feeding; crate and potty training; and basic cues—sit, stay, come here—as well as more complex goals, such as bite inhibition and water safety. It shows how to avoid or correct typical behavior problems, including jumping, barking, and leash-pulling. Plus: how to make your dog comfortable in the world—a dog that knows how to behave in a vet's office, is at ease around strangers, and more. In other words, the best dog ever.

This is a true story of how we came to have a wonderful dog as part of our family. It's a story about an orphan puppy that becomes top dog in a family that adopts him and loves him. The name Sgt Major is considered to be Top Dog in the army. The homeless dog in the animal rescue shelter needed a family and they esteemed him to be the best dog they could ever ask for. Our family made him a top dog because he was so loving and turned out to be the most rewarding of all the dogs we have ever owned. My children and I thought it was time to find a good home for our baby bunny rabbits that we had raised in our back yard. So we brought them to the local animal rescue shelter to be adopted by a family that wants to have a loving pet. That is where you go when you want to adopt a pet. We saw so many cats and dogs while we were there that needed to be adopted to a good and loving home. Our hearts were filled with compassion as we looked at each one. All the animals looked so sad and scared without having a good home of their own. It is a very happy ending when you can pick a lost animal to bring home. Everyone is happy. When we love animals they fill our hearts with joy. Animals are very happy too when they are cared for and loved by their owner's.

“Change loves me, defines and stalks me like a laser-guided smart bomb. It comes at me in all forms, suddenly and with enormous impact, from making shifts in work to having and raising a kid to buying a cabin on a distant mountaintop. Sometimes, change comes on four legs.” In his popular and widely praised *Running to the Mountain*, Jon Katz wrote of the strength and support he found in the massive forms of his two yellow Labrador retrievers, Julius and Stanley. When the Labs were six and seven, a breeder who'd read his book contacted Katz to say she had a dog that was meant for him—a two-year-old border collie named Devon, well bred but high-strung and homeless. Katz already had a full canine complement, but instinct overruled reason, and soon thereafter he brought Devon home. *A Dog Year: Twelve Months, Four Dogs, and Me* is the story of how Devon and Jon—and Julius and Stanley—came to terms with each other. It shows how a man discovered a lot about himself through one dog (and then another) whose temperament seemed as different from his own as day is from night. It is a story of trust and understanding, of life and death, of continuity and change. It is by turns insightful, hilarious, and deeply moving. **BONUS:** This edition contains an excerpt from Jon Katz's *Going Home*.

America's foremost authorities on dog care and training distill decades of experience in a comprehensive "foundational" guide for dog owners. No matter what training method or techniques you use with your dog, the training is unlikely to be optimally successful unless it is predicated on an understanding of the dog's true nature. Dogs need food, water, exercise and play, rest, veterinary care--the basics. But since dogs naturally want to be led, they also need focused and compassionate guidance. Through abundant stories and case studies, the authors reveal how canine nature manifests itself in various behaviors, some potentially disruptive to domestic accord, and show how in addressing these behaviors you can strengthen the bond with your dog as well as keep the peace. The promise of this book is that, especially in an ever-accelerating world filled with digital distractions, you can learn from your dog's example how to live in the moment, thereby enriching your life immeasurably.
