Whatever happened to Bozo the Clown, to Aunt Norma, to Solomon C. Whiskers, those television celebrities who hammed it up between cartoons and contests during local kids' shows? In *Hi There, Boys and Girls! America's Local Children's TV Programs*, Tim Hollis tracks down the story of every known local children's TV show from markets across the United States. There have been many books about children's television on the networks, and such shows as *Captain Kangaroo*, *Howdy Doody* and *Sesame Street* are legends in broadcasting. For every performer on the scale of a *Captain Kangaroo* or a *Buffalo Bob*, there were five or six local personalities who were just as beloved by their viewers - and sometimes even more so - since these local stars could be counted on for appearances at stores, children's hospitals, and shopping centers, where kids could meet them face-to-face. *Hi, There, Boys and Girls!* Includes a capsule history of this programming from the earliest days of radio to the early 1970s, when a combination of social changes and broadcast regulations sent most of the hosts into retirement. Walt Disney observed that while there is very little adult in a child, there is a lot of child in every adult. This book will bring back a flood of long-submerged memories for anyone who was a child during this golden era. Includes *Uncle Walt (Sickles)*, *Miss Nancy (Stillwell)*, *Flippo the Clown*, etc.

' Hindi films go deep into us. They allow us to play a number of roles. They offer us a vocabulary for the moments that are too deep—or sometimes too improbable—for language. ' Bollywood rules our lives: it entertains us, gives us dreams, fills us with longing, makes us laugh. It is glorious and it is absurd. *The Greatest Show on Earth* celebrates all that is fascinating about Hindi cinema. Writers and industry insiders like Saadat Hasan Manto, Salman Rushdie, Bhisham Sahni, R.K. Narayan, Ismat Chughtai, Suketu Mehta, Shobhaa Dé, Dev Anand, Dada Kondke and Manna Dey write about superstars and strugglers, filmmakers and playback singers, on-screen kisses and off-screen romance, the casting couch and censorship. Compiled and edited by one of India's most perceptive and entertaining commentators on the Hindi film industry, this eclectic, wide-ranging anthology will inform and delight everyone with an interest in Indian cinema and popular culture.

ONE OF THE BEST BOOKS OF THE YEAR: Forbes • Lit Hub • Electric Lit A gorgeous graphic memoir about loss, love, and confronting grief When Kristen Radtke was in college, the sudden death of a beloved uncle and the sight of an abandoned mining town after his funeral marked the beginning moments of a lifelong fascination with ruins and with people and places left behind. Over time, this fascination deepened until it triggered a journey around the world in search of ruined places. Now, in this genre-smashing graphic memoir, she leads us through deserted cities in the American Midwest, an Icelandic town buried in volcanic ash, islands in the Philippines, New York City, and the delicate passageways of the human heart. Along the way, we learn about her family and a rare genetic heart disease that has been passed down through generations, and revisit tragic events in America's past. A narrative that is at once narrative and factual, historical and personal, Radtke's stunning illustrations and piercing text never shy away from the big questions: Why are we here, and what will we leave behind? (With black-and-white illustrations throughout; part of the Pantheon Graphic Novel series)

In this fascinating book, New Yorker business columnist James Surowiecki explores a deceptively simple idea: Large groups of people are smarter than an elite few, no matter how brilliant—better at solving problems, fostering innovation, coming to wise decisions, even predicting the future. With boundless erudition and in

delightfully clear prose, Surowiecki ranges across fields as diverse as popular culture, psychology, ant biology, behavioral economics, artificial intelligence, military history, and politics to show how this simple idea offers important lessons for how we live our lives, select our leaders, run our companies, and think about our world.

The 1970 World Cup is widely regarded as the greatest ever staged, with more goals scored per game than any tournament since. But more than just the proliferation of goals was the quality of the overall football, as some of the greatest teams ever to represent the likes of Argentina, West Germany, Uruguay and England came together for a tilt at the world title. But at the heart of the tournament were Brazil; led by Carlos Alberto and featuring players such as Pel é , G é rson, Jairzinho, Rivellino and Tost ã o, the 1970 Sele ç ã o are often cited as the greatest-ever World Cup team. Using brand new interviews alongside painstaking archival research, Andrew Downie charts each stage of the World Cup, telling the remarkable story of the tournament in the players' own words. The result is an immediate, insightful and compelling narrative that paints an utterly unique portrait of an extraordinary few weeks when football hit peaks it has seldom even neared in the years before or since.

The Not-So-Greatest Show on Earth

"Charles Darwin's masterpiece, *On the Origin of Species*, shook society to its core on publication in 1859. Darwin was only too aware of the storm his theory of evolution would provoke. But he would surely have raised an incredulous eyebrow at the controversy still raging a century and a half later. Evolution is accepted as a scientific fact by all reputable scientists and indeed theologians, yet millions of people continue to question its veracity"--Publisher description.

Alfred's Basic Piano: Chord Approach Solo Book 1

The essential book to understanding Donald Trump as a businessman and leader—and how the biggest deal of his life went down. Now, Barrett's classic book is back in print for the first time in years and with an introduction about Trump's 2016 presidential campaign. Donald Trump claims that his success as a “ self-made ” businessman and real estate developer proves that he will make an effective president, but this devastating investigative account by legendary reporter Wayne Barrett proves otherwise. Back in print for the first time in years, Barrett ’ s seminal book reveals how Trump put together the biggest deal of his life—Trump Tower—through manipulation and deceit; how he worked with questionable characters from the mafia and city politics; and how it all nearly came crashing down. Here is a vivid and inglorious portrait of the man who wants now to be the most powerful man in the world. In *Trump: The Greatest Show in the*

World—The Deals, the Downfall, the Reinvention, Barrett unravels the myth and reveals the truth behind the mogul ' s wheelings and dealings. After decades covering him, few reporters know Trump as Barrett does. Instead of the canny businessman that Trump claims in his own books, Barrett explores how Trump exploited his father ' s banking and political connections to finance and grease his first major deals. Barrett ' s investigative biography takes us from the days of Donald ' s lonely youth to his brash entry into the real estate market, and to the back room deals behind his New York, Atlantic City and Florida projects. Most compellingly Barrett paints an intimate portrait of Trump himself, a man driven by bravado, obsessive self-regard, and an anxious ruthlessness to subdue his rivals and seduce anyone with the power to aid his empire. We see him head to head with an opponent as powerful as Pete Rozelle, ingratiating himself with the brooding governor on the Hudson, and fueling the Drexel engine driven by Michael Milken with hundreds of millions in fees—paid, ironically, by gaming companies to fend off Trump takeovers. We explore his complicated emotional and business relationship with his first wife, Ivana, and the use he planned to make of his mistress—and later, his second wife—Marla Maples as a “ southern strategy ” in his then contemplated presidential campaign. With interviews with scores of adversaries and former colleagues, we are given a privileged look at Trump the businessman in action—reckless as often as he is brilliant, reliant on threats as much as on charm, and ultimately a cautionary tale: is this the man we want to lead the world? PRAISE FOR TRUMP: “ Trump is a withering portrait of the most self-mythologized and promoted businessman of our era, an exhaustively researched and long-overdue antidote to Trump ' s own books. It is a penetrating portrait of the age that spawned him and the many who aided and abetted his rise. Trump seems destined to be the definitive account of how Trump got ahead and why he fell. It is a sad story, with important lessons for us all. ” —James B. Stewart, Pulitzer Prize – winning author of Den of Thieves “ Donald Trump surprises us again. Wayne Barrett ' s Trump is a fresh, detailed, and vivid account of the tangled connections of money, politics, and power in our times. ” —Nicholas Pileggi, author of Wiseguy

The Greatest Show on Earth, the Destruction of a Chosen Nation

Richard Dawkins, the undisputed high priest of evolution/atheism, says his book The Greatest Show on Earth: the evidence for evolution is the first time he has presented all the evidence for evolution/long ages. It is promoted as an unanswerable demolition of creation. Scientist, logician, chessmaster and author of the world's biggest-selling creationist book, CMI's Dr Jonathan Sarfati, relentlessly demolishes Dawkin's claims point-by-point, showing biblical creation makes more sense of the evidence. - Publisher.

*Includes pictures. *Highlights Barnum's entertainment career and transition into the circus. *Includes a bibliography for further reading. "We bring you the circus - that Pied Piper whose magic tunes lead children of all ages into a tinselled and spun-candied world of reckless beauty and mounting laughter; whirling thrills; of rhythm, excitement and grace; of daring, enflaming and dance; of high-stepping horses and high-flying stars. But behind all this, the circus is a massive machine whose very life depends on discipline, motion and speed - a mechanized army on wheels that rolls over any obstacle in its path - that meets calamity again and again, but always comes up smiling - a place where disaster and tragedy stalk the Big Top, haunts the back yard, and rides the circus train - where Death is constantly watching for one frayed rope, one weak link, or one trace of fear. A fierce, primitive fighting force that smashes relentlessly forward against impossible odds: That is the circus - and this is the story of the biggest of the Big Tops - and of the men and women who fight to make it." - Opening remarks from the film *The Greatest Show On Earth!*, a drama set in the Ringling Brothers and Barnum & Bailey Circus. Americans have loved traveling circuses for generations, and none represent the country's love for entertainment quite like the most famous of them all, the Ringling Bros. and Barnum & Bailey Circus. The five brothers who started a circus in Wisconsin, as well as P.T. Barnum, have had their names become synonymous with the circus, so it's only fitting that the manner in which these men entered the business and the merging of their traveling circuses together also make for great stories. Circus promoters have long been viewed as somewhat shady hucksters, but none could top P.T. Barnum, who used a blend of traditional circus entertainment, freak show exhibits, and outright hoaxes to create "The Greatest Show on Earth". Barnum introduced America to Jumbo the Elephant, one of the most legendary acts in the history of the circus, as well as "exhibits" like Joice Heth, an elderly African American woman Barnum advertised as a 161 year old who nursed George Washington. He also notoriously perpetrated hoaxes with General Tom Thumb and claimed to have a live mermaid, so it's no surprise that Barnum is often apocryphally quoted as saying, "There's a sucker born every minute." While he didn't actually say that, he said something similar: "Nobody ever lost a dollar by underestimating the taste of the American public." Around the same time that Barnum was operating the Barnum & Bailey's circus, the Ringling Brothers were engaging in more traditional circus activities in Wisconsin. As their traveling circus became better known in the late 1880s, it was advertised as the "Ringling Brothers United Monster Shows, Great Double Circus, Royal European Menagerie, Museum, Caravan, and Congress of Trained Animals". The Ringling Brothers were eventually successful enough that they were able to buy Barnum's circus after Barnum had already died, and they merged the traveling circuses together in 1919. *The Greatest Show on Earth: The History of the Ringling Bros. and Barnum & Bailey Circus* examines the origins of the famous circuses, the background of the important individuals involved, and their merger into the most famous circus of all. Along with pictures of important people, places, and events, you will learn about "The Greatest Show on Earth" like never before, in no time at all.

Ringling Bros and Barnum & Bailey

"Lane Hamilton takes stock of his life and doesn't like what he finds. His friends are all chasing their dreams, while he's working for a goose-stepping bully on the middle-management track to nowhere. When Lane is fired for sleeping through an important meeting, a high school buddy lands him a job with the Durham Bulls. Despite the grueling hours, it doesn't take him long to realize even a bad day at the yard beats a good one in corporate America. But is his new gig worth risking his magazine-cover girlfriend? And between jealous co-workers and psychotic relief pitchers, will he survive the season? The greatest show on dirt is set in historic Durham Athletic Park, a place so rich in character that it plays as big a role as the crazy cast that makes up Lane's Bulls family. Here is a realistic portrayal of what life was like working in the minor leagues in the early 1990s, before the explosive growth that saw many old ballparks replaced by miniature versions of big league stadiums. No one got rich, but they sure had a good time."--P. [4] of cover.

The Zoologist's Guide to the Galaxy

A century ago, daily life ground to a halt when the circus rolled into town. Across America, banks closed, schools canceled classes, farmers left their fields, and factories shut down so that everyone could go to the show. In this entertaining and provocative book, Janet Davis links the flowering of the early-twentieth-century American railroad circus to such broader historical developments as the rise of big business, the breakdown of separate spheres for men and women, and the genesis of the United States' overseas empire. In the process, she casts the circus as a powerful force in consolidating the nation's identity as a modern industrial society and world power. Davis explores the multiple "shows" that took place under the big top, from scripted performances to exhibitions of laborers assembling and tearing down tents to impromptu spectacles of audiences brawling, acrobats falling, and animals rampaging. Turning Victorian notions of gender, race, and nationhood topsy-turvy, the circus brought its vision of a rapidly changing world to spectators--rural as well as urban--across the nation. Even today, Davis contends, the influence of the circus continues to resonate in popular representations of gender, race, and the wider world.

A Times/Sunday Times Book of the Year DISCOVER HOW LIFE REALLY WORKS - ON EARTH AND IN SPACE 'I love The Zoologist's Guide to the Galaxy. Although it sets out to be (and is) about alien life, what emerges is a wonderfully insightful sidelong look at Earthly biology' Richard Dawkins, via Twitter 'Crawls with curious facts' The Sunday Times We are unprepared for the greatest discovery of modern science. Scientists are confident that there is alien life across the universe yet we have not moved beyond our perception of 'aliens' as Hollywood stereotypes. The time has come to abandon our fixation on alien monsters and place our expectations on solid scientific footing. Using his own expert understanding of life on Earth and Darwin's theory of evolution - which applies throughout the universe - Cambridge zoologist Dr Arik Kershenbaum explains what alien life must be like: how these creatures will move, socialise and communicate. For example, by observing fishes whose electrical pulses indicate social status, we can see that other planets might allow for communication by electricity. As there was evolutionary pressure to wriggle along a sea floor, Earthling animals tend to have left/right symmetry; on planets where creatures evolved mid-air or in soupy tar they might be lacking any symmetry at all. Might there be an alien planet with supersonic animals? Will they scream with fear, act honestly, or have technology? Is the universe swarming with robots? Dr Kershenbaum uses cutting-edge science to paint an entertaining and compelling picture of extra-terrestrial life. The Zoologist's Guide to the Galaxy is the story of how life really works, on Earth and in space.

The Circus Age

NEW YORK TIMES BESTSELLER • “ The single most important explanation, and the fullest explanation, of how Donald Trump became president of the United States . . . nothing less than the most important book that I have read this year. ” —Lawrence O ’ Donnell How did we get here? In this sweeping, eloquent history of America, Kurt Andersen shows that what ’ s happening in our country today—this post-factual, “ fake news ” moment we ’ re all living through—is not something new, but rather the ultimate expression of our national character. America was founded by wishful dreamers, magical thinkers, and true believers, by hucksters and their suckers. Fantasy is deeply embedded in our DNA. Over the course of five centuries—from the Salem witch trials to Scientology to the Satanic Panic of the 1980s, from P. T. Barnum to Hollywood and the anything-goes, wild-and-crazy sixties, from conspiracy theories to our fetish for guns and obsession with extraterrestrials—our love of the fantastic has made America exceptional in a way that we’ve never fully acknowledged. From the start, our ultra-individualism was attached to epic dreams and epic fantasies—every citizen was free to believe absolutely anything, or to pretend to be absolutely anybody. With the gleeful erudition and tell-it-like-it-is ferocity of a Christopher Hitchens, Andersen explores whether the great American experiment in liberty has gone off the rails. Fantasyland could not appear at a more perfect moment. If you want to understand Donald Trump and the culture of twenty-first-century America, if you want to know how the lines between reality and illusion have become dangerously blurred, you must read this book. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE SAN FRANCISCO CHRONICLE “ This is a blockbuster of a book. Take a deep breath and dive in. ” —Tom Brokaw “ [An] absorbing, must-read polemic . . . a provocative new study of America ’ s cultural history. ” —Newsday “ Compelling and totally unnerving. ” —The Village Voice “ A frighteningly convincing and sometimes uproarious picture of a country in steep, perhaps terminal decline that would have the founding fathers weeping into their beards. ” —The Guardian “ This is an important book—the indispensable book—for understanding America in the age of Trump. ” —Walter Isaacson, #1 New York Times bestselling author of Leonardo da Vinci

The Greatest Show on Earth

In this black comedy, the spotlight shines upon those who love it most: the self-obsessed, self-help culture and the media that generates hysteria for the sake of entertainment, bringing the cults of victimhood and celebrity together. Nothing is sacred in the network competitions for the next big hit, and in their treatment of newsworthy events, the line between truth and fiction doesn't matter as much as the almighty dollar. Satire, it has been said, is not possible in America because

everything eventually comes true. Tragedy, you might say, is both cheapened and still to come when the media gets involved. The Greatest Show on Earth is a timely commentary about the media frenzy surrounding allegations of sex abuse and the popular mania for Reality TV. -Kirkus Discoveries Quote America's cult of psychotherapy combines with its cult of celebrity to create a monster in this amusing satire. Debut novelist Buck isn't afraid to use a sledgehammer to drive home his satirical points. Does psychotherapy infantilize women? You bet—just look at Meme playing with stuffed animals and wearing a diaper! Still, Buck has a vigorous comic imagination and a biting wit, especially when he treats his characters as people instead of cartoon figures. An over-the-top but funny attack on some meaty targets.

Mahakumbh, the Greatest Show on Earth

“ Robert Wilson ’ s Barnum, the first full-dress biography in twenty years, eschews clich é s for a more nuanced story... It is a life for our times, and the biography Barnum deserves. ” —The Wall Street Journal P.T. Barnum is the greatest showman the world has ever seen. As a creator of the Barnum & Baily Circus and a champion of wonder, joy, trickery, and “ humbug, ” he was the founding father of American entertainment—and as Robert Wilson argues, one of the most important figures in American history. Nearly 125 years after his death, the name P.T. Barnum still inspires wonder. Robert Wilson ’ s vivid new biography captures the full genius, infamy, and allure of the ebullient showman, who, from birth to death, repeatedly reinvented himself. He learned as a young man how to wow crowds, and built a fortune that placed him among the first millionaires in the United States. He also suffered tragedy, bankruptcy, and fires that destroyed his life ’ s work, yet willed himself to recover and succeed again. As an entertainer, Barnum courted controversy throughout his life—yet he was also a man of strong convictions, guided in his work not by a desire to deceive, but an eagerness to thrill and bring joy to his audiences. He almost certainly never uttered the infamous line, “ There ’ s a sucker born every minute, ” instead taking pride in giving crowds their money ’ s worth and more. Robert Wilson, editor of The American Scholar, tells a gripping story in Barnum, one that ’ s imbued with the same buoyant spirit as the man himself. In this “ engaging, insightful, and richly researched

new biography ” (New York Journal of Books), Wilson adeptly makes the case for P.T. Barnum ’ s place among the icons of American history, as a figure who represented, and indeed created, a distinctly American sense of optimism, industriousness, humor, and relentless energy.

According to polling data, most Americans doubt that evolution is a real phenomenon. And it ’ s no wonder that so many are skeptical: many of today ’ s biology courses and textbooks dwell on the mechanisms of evolution—natural selection, genetic drift, and gene flow—but say little about the evidence that evolution happens at all. How do we know that species change? Has there really been enough time for evolution to operate? With *The Evidence for Evolution*, Alan R. Rogers provides an elegant, straightforward text that details the evidence for evolution. Rogers covers different levels of evolution, from within-species changes, which are much less challenging to see and believe, to much larger ones, say, from fish to amphibian, or from land mammal to whale. For each case, he supplies numerous lines of evidence to illustrate the changes, including fossils, DNA, and radioactive isotopes. His comprehensive treatment stresses recent advances in knowledge but also recounts the give and take between skeptical scientists who first asked “ how can we be sure ” and then marshaled scientific evidence to attain certainty. *The Evidence for Evolution* is a valuable addition to the literature on evolution and will be essential to introductory courses in the life sciences.

Big Top Burning

Big Top Burning investigates the 1944 Hartford circus fire and invites readers to take part in a critical evaluation of the evidence. The fire broke out at 2:40 p.m. Thousands of men, women, and children were crowded under Ringling Brothers and Barnum & Bailey's big top watching the Flying Wallendas begin their death-defying high-wire act. Suddenly someone screamed "Fire!" and the panic began. By 2:50 the tent had burned to the ground. Not everyone had made it out alive. With primary source documents and survivor interviews, *Big Top Burning* recounts the true story of the 1944 Hartford circus fire—one of the worst fire disasters in U.S. history. Its remarkable characters include: Robert Segee, the 15-year-old circus roustabout and known pyromaniac; and the Cook children, Donald,

Eleanor, and Edward, who were in the audience when the circus tent caught fire. Guiding readers through the investigations of the mysteries that make this moment in history so fascinating, this book asks: Was the unidentified body of a little girl nicknamed "Little Miss 1565" Eleanor Cook? Was the fire itself an act of arson—and did Robert Segee set it? Big Top Burning combines a gripping disaster story, an ongoing detective and forensics saga, and World War II-era American history, inviting middle-grades readers to take part in a critical evaluation of the evidence and draw their own conclusions.

The Evidence for Evolution

China's Change injects timely, original ideas into the world's most important, if confused, debate over how to manage the twin challenges of anaemic economic growth and accelerating global disruption. Change is the cry from the US to Europe, Asia to Australasia. The snag is the West has no playbook to help. China however, to regain control of its future, has regularly reinvented itself by understanding change's nature through traditional philosophy. This book argues it is time to "Look to China" but stresses China's approach to managing change only supplies the process not individual policies: the how not the what. Policies have to be created locally. In managing change, traditional thought is China's X-Factor, the key to China's record-breaking economic transformation. To grasp this, China's Change provides an understanding of China's past, present and future through its philosophy, history, economics, business, politics, prospects and impact in a way that no other book has done. Two big global questions are answered. Can other countries, firms and individuals find paths out of their dim twilight by adapting China's change process? Can China continue to create one-third of world growth, more than the US, EU and Japan combined, to help cure the last decade's global economic malaise? China's roadmap for change enables anyone to navigate growing global disruption. Ironically China's process is built on such ignored-in-the-West ideas as long-term thinking, clear priorities, gradualism and non-ideological pragmatism that earlier powered two centuries of Western economic dominance. If the West and rest of Asia learn from China to manage change, the next global surprise could be another turning of the tables. There is no end to history, only more turns of the wheel: for now China's Change is again the Greatest Show on Earth.
